## What's New in this Catalog:

### Clear Heat Shrink page N13

Flexible PVC Heat Shrink Tubing suitable for industrial and electronic applications. Allows user to inspect die and crimp details after installation of heat shrinkable insulation.

**Thomas & Betts**

### Heavy Wall Shrink-Kon® Heat Shrinkable Insulators

When it comes to moisture-proofing connections and terminations, T&B's heat shrinkable tubing, boots, and end caps have proven themselves over years of service to the industry. Made of thermally stabilized cross-linked polyolefin, these heat-shrinkable insulators may be used over lead, steel, aluminum, copper, standard plastic and elastomeric insulating materials.

T&B heat shrinkable insulators are designed to be easy to use. They provide appropriate level of insulation and abrasion protection.

Where applicable, T&B heat shrink insulators are U.L. Listed. Also, all standard size insulators have an internally applied adhesive sealant.

#### T&B Heat Shrinkable Insulators Offer

- Heavy duty protection.
- A full range of sizes from #16 to 1000MCM.
- Insulation for 3" and 4" bus bar.
- Field-Proven reliability—rated 600V, 90°C.
- Improved protection against moisture is provided by the internal sealant.

#### New Products Include:

- High Shrink Ratio HSHR series with 6:1 shrink ratio designed for applications with extreme differences between cable, connector and back shell sizes.
- Flame Retardant HSFR series provides maximum flame retardancy. For special applications.

### Heavy Wall Shrink-Kon® Heat Shrinkable End Cap, Boots

#### Redesigned for superior durability and performance!

Seals and insulates cable ends at a 600V rating. Installs fast, while providing insulation resistance to moisture, corrosion and abrasion. The extra thickness at the tip of the end cap prevents sharp ends of the cable from puncturing the seal.

Seals and insulates multi-conductor cables and conduit with the same cost savings and superior properties of T&B's heat shrinkable tubing. These boots replace time consuming tapes, epoxies, encapsulations and dips. The boots are internally coated with sealant.

### Shrink-Kon® Medium Wall Tubing

More flexible than heavy wall products, with excellent resistance to impact and abrasion.

### Shrink-Kon® Thin Wall Tubing

Manufactured from stabilized Polyolefin, these insulators are used to insulate bare Sta-Kon® splices and terminals. They additionally provide a degree of strain relief and may be used to harness wires. Available in cut pieces or reels. Colors also available.

#### New Products Include:

- 3:1 adhesive lined thin wall CPO-A series provides excellent flexibility with environmental sealing capability.
- 2:1 halogen free, low-smoke generating thin wall, CPO-HF series. For use in contained areas including underground transportation, shipboard, offshore, military and aerospace applications.
- Clear heat shrink.

### Covers

These new insulating covers provide hard shell insulated protection for "H" type compression taps and splices, and, because there is no taping required, you get uniform quality and appearance each time. The exclusive locking design provides the range taking capability. Only five H-tap insulating catalog numbers accommodate the range of 6 AWG— 1000 MCM in the main, and 12 AWG— 500 MCM in the branch.

- Hard shell outer covers guard against impact...inner seal keeps out dust.
- Installs quickly and easily without special tools...simply snaps together.
- Eliminates time consuming taping.
- Provides high quality, neat, uniform installations.
- Range taking design reduces inventory.

# Shrink-Kon®

## Heavy Wall Heat Shrinkable Tubing

# Shrink Ratio 3:1

### HS Series

- Heavy wall heat shrinkable tubing provides maximum reliability for insulating and protecting cable joints and terminations.
- Withstands severe mechanical requirements of U.R.D., submersible and direct burial installations.
- High impact, abrasion, corrosion and chemical resistance.
- Rated for 600V, 90°C continuous use.

- Thermoplastic adhesive liner provides complete environmental protection and insulation.
- Meets: UL 486D, CSA C22.2 No. 198.2, ANSI C119.1, Western Underground Guide Numbers 2.4, 2.5, ICEA and NEMA insulation thickness requirements.
- Continuous operating temperature: - 55°C to 110°C.
- Shrink temperature 120°C.
- Shrink ratio 3:1.

All lengths have factory applied sealant.  
For other sizes and lengths consult factory.  
U.L. File No. E9809, U.L. 486D.  
\*\* Not U.L. Listed.

T&B's heat shrinkable tubing is made of thermally stabilized cross-linked polyolefin. This provides a recovered wall thickness greater than that of the cable jacket replaced. The insulating covers which have an internally applied sealant offer protection against moisture, may be used over lead, steel, aluminum, copper, standard plastic and elastomeric insulating materials.

### HSFR Series – Flame Retardant Heavy Wall

- Heavy wall, heat shrinkable tubing insulates and protects electrical splices and terminations where maximum flame retardancy and exceptional insulating and sealing characteristics are required.
- High impact and abrasion resistance – capable of withstanding severe mechanical abuse of U.R.D., submersible and direct burial installations.
- HSFR tubing will not split or rupture during installation, even when overheated.
- Thermoplastic adhesive liner provides complete environmental protection and insulation.
- Meets: UL 486D, CSA 22.2 No. 198.2, ANSI C119.1, Western Underground Guide Nos. 2.4, 2.5, MIL-DTL-23053/15, IEEE 383 Vertical Flame Test, ANSI C37.20.2, ICEA S-19-8 and NEMA insulation thickness requirements.
- Rated for 600V, 90°C continuous use. Continuous operating temperature - 55°C to 110°C.
- Shrink temperature 120°C.
- Shrink ratio 3:1

## Heat Shrinkable End Caps

# Shrink Ratio 3:1

### HSC Series End Caps

- Redesigned for superior durability and performance!
- Heat shrinkable end caps provide a simple yet effective method for sealing cable ends, pipe conduit, or other similar objects where maximum flame retardancy is required.
- Superior resistance to weathering, moisture contamination and adverse environmental conditions.
- Flame retardant.
- Rated from 600/1000V, 90° continuous use.
- Resistant to common fluids and solvents.
- Adhesive liner provides complete environmental protection and insulation.
- Heat indicating lines. Continuous operating temperature: -55°C to 110°C.
- Shrink temperature 120°C.
- Shrink ratio 3:1.

\* Not U.L. Listed or CSA Certified  
Material: Thermally stabilized, modified polyolefin provided with mastic sealant on I.D. applied approximately 1" deep.

Seals and insulates cable ends at a 600V rating. Installs fast, while providing insulation resistance to moisture corrosion and abrasion. The extra thickness at the tip of the end cap prevents sharp ends of the cable from puncturing the seal.

### HSB Series – Heat Shrinkable Breakout Boots

- Boots for 2, 3 and 4 way cable breakouts.
- Strain relief and mechanical protection.
- Thermoplastic adhesive liner provides complete environmental protection and insulation.
- Shrink ratio accommodates a wide range of cables.
- Meets ESI 09-11.
- Continuous operating temperature: -55°C to 100°C.
- Shrink temperature: 135°C.

Ultimate Elongation	ASTM D412, IEC 540	600%
Elongation after Heat Aging (168 hrs. at 175°C)	ASTM D412, IEC 540	520%
Heat Shock (4 hrs. at 225°C)	ASTM D2671	No dripping, cracking, flowing
Low Temperature Flexibility (-55°C)	ASTM D2671	No cracking
Flammability	ASTM D630	Self ext. within 1.97"
<b>ELECTRICAL</b>		
Dielectric Strength	ASTM D2671	280 V/Mil (11kV/mm)
<b>CHEMICAL</b>		
Water Absorption	ASTM D570	0.03%

### HSMW Series – Medium Wall

- More flexible than heavy wall product. Seals and protects cable splices and terminations.
- High resistance to impact and abrasion.
- Continuous operating temperature - 55°C to 110°C.
- Thermoplastic adhesive liner guarantees complete environmental protection and insulation.
- Shrink temperature 120°C.
- Shrink ratio 3:1.

### HSMW Series Medium Wall Heat Shrinkable Tubing

- Custom lengths available subject to factory quotations. Consult factory for availability.
- This item may require longer lead time for ordering. Minimum quantities may apply.

### Technical Data – HSMW Series

Property	Test Method	Typical Performances
<b>PHYSICAL</b>		
Tensile Strength	ASTM D412, ISO 37	2100 psi (14.5MPa)
Elongation	ASTM D412, ISO 37	550%
Longitudinal Change	ASTM D2671	+1%, -10%
Specific Gravity	ASTM D792, ISO/R1183	1.1
Elongation after Heat Aging (168 hrs. at 150°C)	ASTM D2671, ISO 37	500%
Heat Shock (4 hrs. at 225°C)	ASTM D2671	No cracking or flowing
Low Temperature Flexibility (4 hrs. at -55°C)	ASTM D2671	No cracking
Hardness (Shore D)	ASTM D2240	50D
<b>ELECTRICAL</b>		
Dielectric Strength	ASTM D149, IEC 243	500 V/Mil (20kV/mm)
Dielectric Voltage Withstand (2500 V, 60Hz, 1 Min.)	UL 486D	No Breakdown
Volume Resistivity	ASTM D257	10 <sup>16</sup> ohm-cm
<b>CHEMICAL</b>		
Fluid Resistance	MIL-DTL-23053/5, ISO 1817, ISO 37	Good to Excellent
Copper Corrosion	ASTM D2671	No Corrosion
Fungus Resistance	ASTM G21	No Growth
Water Absorption	ASTM D570	0.1%
<b>ADHESIVE</b>		
Adhesive Lap Shear (1 in./min. at 23°C)	ASTM D1002 (mod)	125 psi (.875 MPa)
Adhesive Softening Point	ASTM E28	92°C/-5°C
Adhesive Peel Strength (300mm/min. at 23°C)	ASTM D1000	
• to steel, aluminum, P.E.		35 pli
• PVC		20 pli
Adhesive Blocking (30°C)	ASTM D1146	No Blocking
Water Penetration	STM 706	No penetration after 286 hrs. of continuous immersion

### CPO Series – Thin Wall Tubing, Non-Lined

- Flame retardant.
- Resistant to common fluids and solvents.
- Meets UL 224, 125°C; CSA C22.2 No. 198.1, 125°C; MIL-DTL-23053/5

- Class 1&2; AMS 3636 & 3637; DEF STAN 59-97, Issue 3, Type 2a.
- Continuous Operating Temperature - 55°C to 135°C.
- Shrink temperature: 120°C.

### CPO Series Thin Wall Heat Shrinkable Tubing

CPO1000-_-_-	1.000" (25.4)	.500" (12.8)	.035" (.9)	350 - 2/0 MCM

Available in reels of 100' and 1000', consult Technical Service. U.L. 224. Available in other colors, consult Technical Service.

Material: Cross-linked Polyolefin. Temp. Range: 125°C.

U.L. Recognized File Number E137759 and CSA Certified. (Note clear material not U.L. Recognized).

Meets MIL-1-23053/5. (No marking on tubing). When ordering standard package, order by package not feet.

Use feet and inches only when ordering special cut lengths.

• Larger diameters available upon special request. Consult Customer Service.

### Thin-Wall Heat Shrinkable Tubing Kit

Cat. No.	Description	Std. Pkg.
HS-KIT	Assortment of six different sizes (from 3/16" to 1") of thin wall heat shrinkable tubing pre-cut to 6" lengths. Exceptional value, also includes handy plastic storage case.	1

### Custom Cut Length of Bulk Packaging – Thin Wall Tubing

To best meet your requirements for thin wall heat shrinkable tubing, Thomas & Betts welcomes the opportunity to cut bulk reels of tubing. Minimum order requirement is one standard bulk reel and multiples thereof. Tubing cannot be cut smaller than ½ inch. When ordering custom cut lengths of tubing, order by piece, not by length. To determine the minimum number of pieces to order, simply figure how many pieces of a specific length of tubing is required to make use of a complete bulk reel.

### Ordering Information

		Bulk Reel Qty. Ft. (CMP only)			
Family	Expanded ID			Color	Packaging
CPO =	Cross Link	63 = ¼"	1000	0 = Black	A = 4'
	Modified	93 = ⅜"	1000	C = Clear	B = Bulk
	Polyolefin	125 = ½"	1000	2 = Red	(See price sheet for lengths)
		250 = ¾"	1000	4 = Yellow	
		375 = ⅞"	500	5 = Green	C = 100'
		500 = 1"	400	6 = Blue	25 = 25' Reel
		750 = ¾"	300	9 = White	
		1000 = 1"	300	S = Green & Yellow Striped	

### Example

Material	Size	Color	Package
CPO	-375	-0	-C

Minimum order quantity: Standard case quantities and multiples thereof. No broken packages may be ordered. To order colors other than black and clear ¾" tubing CPO or specials/cut lengths, consult customer service for minimum order quantities, price and availability.

#### Example 1

If a bulk length of tubing is 1000 feet and the desired length of each individual piece is 6 inches, the minimum order requirement is 2000 pieces.

Given (length of reel)	1000 Feet
Convert to inches by multiplying by 12	12 x 1000
Length of reel in inches	= 12000
Divide by desired length	12000 ÷ 6
Total number of 6 inch pieces in a 1000 foot reel (Minimum Order)	= 2000

#### Example 2

If a bulk reel of tubing is 400 feet and the desired length of each individual piece is 2 inches, the minimum order requirement is 2400 pieces.

Given (length of reel)	400 Feet
Convert to inches by multiplying by 12	12 x 400
Length of reel in inches	= 4800
Divide by desired length	4800 ÷ 2
Total number of 2 inch pieces in a 400 foot reel (Minimum Order)	= 2400

#### Example 3

CPO125-0-7500

CPO material, size 125 (½"), black, ¾ inches long.

#### Example 4

CPO500-6-1.500

CPO material, size 500 (1½"), blue, 1½ inches long.

### Technical Data – Thin Wall Tubing

Property	Test Method	Typical Performances

Fungus Resistance	ASTM G21	No Growth

**CPO-A Series – Thin Wall, Adhesive Lined**

- Adhesive lined heat shrink tubing with environmental sealing capability for general purpose commercial and industrial applications.
- Moisture-proof environmental seal.
- Flexible.
- High 3:1 shrink ratio for covering irregularly shaped objects.
- Continuous operating temperature - 55°C to 110°C.
- Shrink temperature 120°C.

## Thin Wall Heat Shrinkable Tubing

NEW  
PRODUCT

# Shrink Ratio 2:1

### CHS Series – Clear Thin Wall PVC Heat Shrink

- Flexible PVC Heat Shrink Tubing suitable for industrial and electronic applications. Allows user to inspect die and crimp details after installation of heat shrinkable insulation.
- UL standard UL224, VW-1 rated.
- CSA standard C22.2 no. 198.1 oft.
- Highly flame retardant.
- Flexible.
- Low shrink temperature of 110°C.
- Dielectric strength – 600 volts/MIL.

### CHS Series Thin Wall Heat Shrinkable Tubing

HTC1000	7"	2 $\frac{1}{2}$ "	3 $\frac{1}{8}$ "
HTC1000L	10"	2 $\frac{1}{2}$ "	3 $\frac{1}{8}$ "

Interlocking insulating covers for "H" type compression taps. For use in splice boxes, indoors, or in tray indoors.  
Place the H-Tap in the cover. Snap the cover closed.

### Technical Data – H-Tap Insulating Cover (Hard Cover)

HTC2 and HTC2S use insulation wrap instead of end cushions for inner seal.

Connector Cat. Nos. 54755 through 54790 and 63148 through 63180 require hydraulic crimping tools. Refer to instruction sheets.

Outer Hard Shell Covers — High Impact Black Thermoplastic (Noryl) Flammability Class, U.L. 94V-1

Inner seal — Black neoprene sponge soft closed cell, oxygen index 28% U.L. 94 HBF

Temperature Rating — 90 °C Maximum

Voltage Rating — 600 Volts maximum

Uses insulation wrap instead of end cushions for inner seal.

Note: insulation covers are not reusable.

## Splice Insulators and Insulating Covers

### Adhesive Insulating Covers

#### General Information:

- Voltage Rating up to 600 Volts.
- Adheres to Metals, Rubber and Synthetic Materials.
- Seals against Moisture.
- Workable from 14°F to 120°F.
- Maximum Operating Temperature 176°F.
- No installing tools required.

\* U.L. Listed for use with T&B Covers

For "H" Taps, "C" Taps, two way connectors, mechanical taps and Color-Keyed lugs and joints. Material: 6 mil electrical vinyl backing, butyl rubber mastic adhesive thickness 1/8 inch approx. Polyethylene release sheet.

U.L. Listed—File No. E9809  
Not for submersion in liquid.

#### Electrical Properties

Dielectric constant 3.2 ASTM-D150 (60 Hz)  
Power factor .007 ASTM-D150 (60 Hz)  
Dielectric strength 340 Volts/mil ASTM-D1373  
Chemical Properties

Water absorption .06% ASTM-570

Ozone resistance—excellent .03% ASTM-D1373  
Corrosion none visible—per ASTM-D 69  
Also available in 10' rolls.  
Consult customer service.

### HSTS25 - Tape Sealant

- Tape sealant should be used in conjunction with T&B Heat Shrinkable Insulators for better moisture sealing.

#### HSTS25

Cat. No.	Description	Width	Thickness	Length
HSTS25	Tape Sealant	1"	1/16"	25 ft.

1. The cable, etc. should be relatively clean and free of greases, oils, and other foreign substances.
  2. It is best to overlap each wrap of tape by 1/4 to 1/2 the width for the best seal.
  3. When using heat shrinkable products most applications require only 1 or 2 layers of tape prior to sliding tubing in place.
  4. Shrink the tubing, cap, boot, etc. following the installation procedure for the applicable heat shrinkable part.
- To seal the junction or crotch of application requiring two or more cables, conductors, etc. without a common jacket.
1. Apply the overlapped 1 or 2 layers around each cable, conductor, etc. at the same distance from the connector or, ball up the sealant and press into crotch or junction of the joint.
  2. Apply 2 overlapping wraps over the bundle.
  3. Slide the expanded heat shrinkable part over the joint and shrink.

### Technical Data – HSTS25 - Tape Sealant

Property	Test Method	Typical Performances
----------	-------------	----------------------

#### PHYSICAL

Description: Butyl Rubber Polymer  
Application Temperature: 40°F to 100°F  
Service Temperature: -40°F to 180°F  
Environmental Resistance: Resists ozone and all normal aging processes.

#### ELECTRICAL

Dielectric Strength: 250 v/mil minimum  
Volume Resistivity: 10<sup>14</sup> ohms/cm.

#### CHEMICAL

Chemical Resistance: Resists acids, bases and alcohols. Passes Fed. Spec. SS-S-00210, section 3.6.

### Medium Voltage Motor Stub Splice Insulator

Lets you insulate and waterproof motor lead connections up to 5KV — quickly, dependably.

- Installs in seconds.
- Waterproof and abrasion resistant.
- One size fits all hookups — reduces inventory.
- Allows easy inspection of connection.
- Long lasting and reusable.
- Quality engineered.

This insulator is designed to give you a quick, dependable means of protecting medium voltage motor stub splice connections up to 5KV. You can install it in seconds simply by pushing the cover and boot together. Once installed, it completely waterproofs the connection and provides excellent protection against abrasion or mechanical abuse.

#### One size reduces inventory.

The insulator accommodates wire sizes #8-2/0 AWG having outer diameters of .375 to .840. This range-taking feature should accommodate all of your medium voltage motor hookups.

#### Inspectable and reusable.

The insulator consists of just two parts: an elastomer boot and thermoplastic cap. The boot has two tapered cable entry legs that fit snugly around the cable to form a watertight seal. The legs are designed to be trimmed during installation to tightly fit the required cable size. The cap simply pushes into a groove in the boot — and pulls out easily when you want to inspect the connection. Removal of the cap does not disturb the seal around the cables nor does it interrupt the bolted splice connection.

#### Quality engineered.

The boot is made of flexible, abrasion-resistant elastomer; the cap of high impact-resistant thermoplastic — high performance materials you can depend on. Use the insulator for pigtail applications in motor junction boxes, manholes, or wherever a waterproof, impact-resistant insulator is required.

*The MSCV20 is a first generation completely waterproof multi-splice insulator which consists of only two parts, an elastomeric boot with two tapered cable entry protrusions and a hard plastic cover cup. When mated with the elastomeric boot the cover cap provides durable mechanical protection as well as a water tight installation. The insulator is designed for pigtail applications and can be used anywhere. Installs in seconds lowering the installed cost, versus conventional methods.*

#### Medium voltage (5 KV) multi-splice insulator

- Water tight
- Flame retardant
- Flexible boot
- Impact resistant cap
- 5000 volts @ 90°C
- Range taking
- Reusable
- Fast-easy to use
- Inexpensive
- Dependable

### Wide Range Splice

Cat. No.	600 Volts Wire Range	Insulation O.D. Range	Bolt Max. Length	Length L $\pm \frac{1}{16}$	Dia. A $\pm \frac{1}{32}$	Dia. B $\pm \frac{1}{32}$	Dia. C $\pm \frac{1}{32}$
MSCV20	2 AWG-350	.375-.840	1 1/4	6 1/2	3	2 1/32	2

### Technical Data – Medium Voltage Motor Stub Splice Insulator

5KV wire range #8 AWG-2/0

Rating: 90°C applications

U.L. Listed to 600 volts

CSA certified to 600 volts

T&B recommended to 5000 volts

Material: Cap - NORYL, U.L. 94V-1

Boot - EPDM Elastomer, U.L. 94V-2

Lubricant - Silicone Grease

# Shrink-Kon®

## Splice Insulators and Insulating Covers

*Multi-splice insulator permits fast, dependable insulation and waterproofing of outdoor and buried connections up to 600V. The reusable insulator snaps closed and can be opened for inspection.*

### Quick Seal Multi-Splice Insulators

600 volts at 90°C. All-purpose quick seal multi-splice can be used wherever a watertight insulator is needed in motor junction boxes, manholes, street lighting, bridges, machines, rooftop air conditioning, airport lighting, as well as in marine use. The insulator is of a two-piece design, an abrasion-resistant elastomer cable entry boot and a high impact-resistant thermoplastic quick seal cap. It is fast and easy to use. Installs in seconds, completely waterproof, long lasting, reusable, inspectable, flame retardant, impact-resistant, range taking, inexpensive and totally dependable.

### Technical Data

Material: Cap - NORYL, U.L. 94V-1    Boot - EPDM Elastomer, U.L. 94V-2    Lubricant - Silicone Grease

- Reenterable waterproof motor stub insulator.
- Easy installation.
- No special tools required.
- Permits inspection of connector joint by simply removing the snap on cap.
- Wide cable range.
- Long life.

### Motor Stub Splice Insulators

Lets you inside motor lead connections dependably ... in seconds. This innovative product has been designed to insulate motor stub splices quickly, easily and dependably. It consists of a boot-type insulator with integral TY-RAP® cable ties. To install, simply position the insulator over the bolted splice, and tighten the cable ties. That's all there is to it. It produces uniform, high quality installations every time ... in about 30 seconds. The completed installation is immediately ready for inspection and use. If required, the insulator can be easily removed. Simply snip the cable ties and slide the insulator off the splice. It leaves no sticky residue.

# Shrink-Kon®

## Installation Tools

### Heavy Duty Self-Igniting Torch

*Built to last.*

The Shrink-Kon® Torch is engineered to provide years of long, dependable and efficient service. The body is constructed of strong, lightweight cast aluminum; burn tube and conduit of stainless steel; venturi, orifice and burn

tips of solid brass. Two separate burn tips are available, one for heat shrinkable tubing, one for brazing and soldering.

Torch easily screws to all commercially available 14 and 16 oz. propane cylinders.

- *Heavy duty self-igniting torch is built for the professional.*
- *Single hand ignition makes shrinking, brazing and soldering fast, easy and efficient—at all angles, even upside down, and in windy conditions.*
- *Torch easily screws to all commercially available 14 and 16 oz. propane cylinders.*
- *Trigger ignition lights the SHRINK-KON® Torch automatically—no flints, batteries, or strikers to wear out—its piezo electric crystal provides*

*over 30,000 ignitions before servicing, generating 24,000 volts to ignite the torch instantly.*

- *Its built-in pressure regulator provides a constant gas flow rate in all positions so your torch won't flare out when you need it most—upside down, turned on its side, or in windy conditions.*
- *Perfect for heat shrinkable tubing, brazing sheet metal and light steel, or soldering applications.*

SIT-1

SIT-2

### Heavy Duty Self-Igniting Torch

Cat. No.	Description
SIT-1	SHRINK-KON® Torch for 14 or 16 oz. cylinders
SIT-2	Adapter and 5 foot extension hose

WT1400

### Electric Heat Gun

Cat. No.	Description
WT1400	Dual Speed/Temp. 450-1000°F 1400 watts requires 12-18 amp outlet

U.L./CSA approved  
450°F to 1000°F heat range.  
120 V. 60 Hz A.C.

Note: Other installation tools are available. Contact your Local Distributor or Thomas & Betts Technical Service Department.

## Installation Guidelines

### Installation

Figure 1  
1. Connector and Heat Shrinkable Tubing prior to installation.

Figure 2  
2. Crimp connector installed.

Figure 3  
3. Heat Shrinkable tube in position.

Figure 4  
4. Heat Shrinkable tube after heat application.

### Factory Applied Sealant

A standard sealant is coated on the entire inside surface of most precut sizes. Tubing is also available without sealant – consult factory. The sealant is rated for continuous 90°C operation on non-pressurized cable systems and aids in sealing out moisture and corrosion.

### Cost and Reliability of Heat Shrinkable Tubing compared to tape

The cost differential in the installation of T&B heat shrinkable tubing over taping can result in up to a 34% savings in labor and overhead. For example, on a 2/0 aluminum splice, heat shrinkable tubing can be installed in 3 minutes versus 10 minutes of taping. In addition to the direct cost reduction, there are the advantages of assured uniformity of wall thickness and moisture sealing.

### No Special Installation Skills Required

1. Remove any oil, grease, water, dirt, etc., by wiping the cable ends and connector. **Remove all sharp edges and burrs from connector.**
2. Center tubing over splice connector.
3. Use the light blue outer portion of the flame when using the SIT-1 torch. Do not hold the torch still in one position or concentrate the hot inner flame of the torch on the tubing; this may cause scorching.
4. Begin heating tubing in the center. Recover the central portion of the tubing first by heating around the circumference of the splice. (Keep heat source moving constantly around the circumference of the insulator to ensure uniform shrinkage of the insulator.)
5. Continue heating around the tubing and out toward one end. Move torch around the tubing until one end is completely recovered.
6. Repeat the above procedure on the opposite end of the splice, again working from the center outward and around the tubing.
7. Installation is complete when the tubing conforms to splice and sealant flow is apparent at both ends.

## Typical Specifications

Insulating and sealing of all 600 Volt, in-line cable splices from #16AWG through 1000MCM shall be done in accordance with the instructions provided with the Shrink-Kon® heat shrinkable insulators, catalog series HS.

The connector insulator must be made of thermally stabilized, homogeneous polyolefin having internally applied sealant. It must have Underwriter's Listing (UL486, 90°C, 600V) and be approved for the use. It must be usable without additional covering or adhesive both indoors and outdoors, in overhead, direct burial, or submersed applications at rated voltage. It must not be adversely affected by moisture, ozone, oils, fuels, mild acids and alkalies, or ultraviolet light. It must be compatible with all commonly used cable jacket materials including rubber, plastic, lead, steel, aluminum, and copper.
