Steel City®

840, 640 Series—  
Flush Multiple Service

665-SC

P60 Series—power application

P60 Series—Communication/Data Application

## Floor Box Systems

The aesthetic and technical needs of today's buildings are as diverse as the equipment that fills them. Small wonder, then, that floor boxes can continue to solve the needs of today and the future as they did in the early 1900's when they were invented. They are still a contemporary, capable and cost-effective wire management system. Steel City, a pioneer in both the design and application of floor boxes since 1904, invites you to discover, or rediscover, the possibilities.

## Three Levels of Service

### Concealed Service

All power, communications and data devices are hidden below the finish floor level.

664 Series

### Flush Service

All power devices are mounted at the finish floor level.

600 Series

### Above Floor Service

All power devices are mounted in a service fitting head above the finish floor.

SFH-40 Series

### 667SC Series Concealed Service Floor Box

#### Features and Benefits

- Largest capacity concealed service floor box on the market.
  - Four “double-gangs” allow for two duplex receptacles per gang for a total of eight receptacles per box.
  - Each gang has 40 cu. In. of capacity.
  - Box interior has 128 cu. In. of capacity.
- Standard box configuration is for up to 8 power and/or low voltage devices.
  - Box design allows for feed-through cabling for power and low voltage conductors.
- Shallow design.
  - 3" overall height is ideal for renovations and upper level floor installations.
- Full line of low profile covers.
  - Utilizes same quality cover as AFM-8 Access Floor Module.
  - Steel reinforced for added durability.
  - Two retractable cable exit ports.
  - 64 sq. in. opening provides easy access to device panels.
- 1/4" recess for carpet/tile insert.
- Available in gray, black, brown, and beige.
- Box is manufactured with (1) 3/4", (3) 1", & (1) 1-1/4" k.o.'s per gang.
  - This includes a 1" & 1-1/4" k.o. located in the bottom.
- Full complement of device panels.
  - Device panels available with one or two duplex openings, one or two GFI openings, six standard “keystone” with Omni 110 bezels and blanks.
- Provided with leveling legs and base feet.
  - Base feet can be attached to form preventing box movement during concrete pour.
  - Leveling legs provide up to 1 1/2" pre-pour adjustment.
- Manufactured from 14 gauge pre-galvanized steel.
  - Quality construction provides added durability and rust protection.

### 667SC Series Floor Box

Cat. No.	Description	Std. Ctn.
667-SC**	Four Gang Recessed Floor Box*	1
667-RP	Single Duplex Receptacle Plate	4
667-2RP**	Device Panel for 2 Duplex Receptacles with Duplex KOs	4
667-BP	Blank Device Panel	4
667-6RJ**	Device Panel for 6 Keystone Data Jacks	4
667-2G	Device Panel for 2 GFCI Receptacles	4
667-1G	Device Panel for 1 GFCI Receptacle	4
667-CST-GRY	Cover and Carpet Flange - Gray	4
667-CST-BLK	Cover and Carpet Flange - Black	4
667-CST-BRN	Cover and Carpet Flange - Brown	4
667-CST-BGE	Cover and Carpet Flange - Beige	4

\* Supplied with (1) 667RP for 1 duplex receptacle and (1) 667BP Blank Plate.

- The "665" line is an extension of the industry leading "664" series; our concealed service line now allows the customer to install up to four device panels in one box.
- Through the use of a unique nonmetallic wire tunnel the installer can easily partition his power, voice/data requirements.
- This U.L. Listed stamped steel floor box can be installed with Thomas & Betts voice and data connector products.
- The 665SC utilizes the same quality "CST" cover the industry has come to expect from the leader in concealed service floor boxes.
- Four 2½" levelling screws provided with all boxes.
- Device panels ordered separately.

### 665SC Series Concealed Service Floor Box

- Four (4) device compartments can accommodate any combination of devices, for example: (3) duplex power devices and (1) duplex telephone device or (2) voice and data connectors and (1) GFCI device and (1) blank, etc.
- Overall height of 3½" allows for shallow pours when needed.
- Nylon carpet flange (665-CST) cover made of resilient nylon material with a ⅝" steel plate assures structural integrity.
- Four side feed thru allows installer to feed thru power or data/comm service from any orientation.
- Nonmetallic wire tunnels aesthetically clean. Full width tunnel provides maximum feed-thru capacity; nonmetallic material prevents conductor damage.
- Total access area of 126 cu. in. allows for friendly installation of workstation cables.
- Contains 28 Knock-outs (16-1¼" and 12-¾" KOs) that provide increased flexibility when installed.

Furnished with 4-#8-32 x 5/8" mounting screws

### Wire Tunnel for 665SC Floor Boxes

Cat. No.	Description	Std. Ctn.
665-WT	Wire tunnel for 665 floor box	4

One provided with box. Material: PVC

665-WT

### Device Panels for 665SC Floor Boxes

Cat. No.	Description	Std. Ctn.
665-RP	Receptacle plate for 665 floor box	4
665-GP	GFCI receptacle plate for 665 floor box	4
665-BP	Blank plate for 665 floor box	4
665-6RJ	Device plate for 6 Keystone Data Jacks	4
665-STEL	Telephone data plate for 665 floor box	4

Material: Pre-Galvanized Steel

### Communication Accessories

#### Features & Benefits

- Universal "Keystone" mounting configuration.
- Labeled for both 568A & 568B wiring.
- Versatile IDC design accommodates 110 or Krone punchdown tools.
- Narrow design for high-density applications.
- Available in a broad range of colors for installation color schemes.

#### Features & Benefits

- Universal "Keystone" mounting configuration.
- Same mounting style as Cat 5e jacks for use in same faceplates.
- Versatile IDC design accommodates 110 or Krone punchdown tools.
- Available in 4 colors (shown above).

### Keystone Category 5e Jacks

Cat. No.	Description	Color

### Multiple Service Floor Boxes for Power, Communications and Data

Multiple Service floor boxes that deliver power, communications and data from standard conduit with no exposed service fittings. Result: Open office planning flexibility. Ideal for the modern office with workstations that have power, communications and data equipment. Power receptacles and low voltage connections can be enclosed underfloor in either steel or cast iron bodies. Galvanized 14-gauge steel boxes are provided with knockouts from 3/4" to 1 1/4" (See Engineering Data). Cast iron bodies have threaded openings for 3/4" and 1" conduit. Hinged floor plate offers easy access to devices and is steel reinforced for superior load bearing characteristics. U.L. & CSA Listed.

#### Hinged Floor Plate

- Carpet covering eliminates unsightly service fittings and metal floor plates. Power cords, low voltage cables run through retractable exit.

- Power and communications/data can be disconnected quickly. Second duplex receptacle may be installed for additional power needs. Blank partitions also available.

#### Wide Access

- Easy to use.
- Wide 3" x 6" opening facilitates activation.

#### Leveling Screws

- Quick leveling to desired concrete depth.
- Box top flush with finish slab.
- After pour adjustment of floor flange: 3/4" from box top.

### Floor Boxes for Single and Duplex Receptacles, or Communications and Data

68 and 600 Series Floor Boxes provide flush service for power or communications / data. 68 and 600 Series Floor Boxes can be used for carpet or tile applications and provide the features listed below.

#### Features – 68 Series

- Stamped steel, concrete tight, fully adjustable.
- Electrogalvanized body and hardware.
- Interior and exterior leveling screws permit adjustment to meet finished floor.
- Shipped complete with expendable cap to prevent ingress of concrete during pour ½", ¾" and 1" knockouts – all bottom knockouts are accessible.
- Uses P60 Series mop tight covers and carpet plate.

- For brushed aluminum, add AL after catalog number.

#### Features – 600 Series

- Cast iron, watertight body, fully adjustable.
- Painted silver enamel inside and out for additional corrosion resistance.
- Interior and exterior leveling screws permit adjustment to meet finished floor.
- Shipped complete with expendable cap to prevent ingress of concrete during pour.
- ¾" threaded conduit openings are standard.
- Uses P60 Series mop tight covers and carpet plate.
- For brushed aluminum, add AL after catalog number.

### Floor Boxes for Single Short Strap Receptacles or Communications and Data

#### Service Fitting Application

78, 88 and 98 Series Floor Boxes provide flush service for power or communications and data. 78, 88 and 98 Series Floor Boxes can be used for either carpet or tile applications and provide the features listed below.

#### Features – 78 Series

- Cast iron, watertight body, semi-adjustable.
- Painted silver enamel inside and out for additional corrosion resistance.
- Exterior leveling screws and threaded vertical adjusting ring permit adjustment to meet finish floor.
- Shipped complete with expandable cap to prevent ingress of concrete during pour.
- ¾" threaded conduit openings.
- Uses P90 Series mop tight covers.

#### Features – 88 Series

- Stamped steel, concrete tight, semi-adjustable.
- Electrogalvanized body and hardware.

- Exterior leveling screws and threaded vertical adjusting ring permit adjustment to meet finish floor.
- Shipped complete with expandable cap to prevent ingress of concrete during pour.
- ½" and ¾" knockouts—all bottom knockouts accessible.
- Uses P90 Series mop tight covers.

#### Features – 98 Series

- Stamped steel, concrete tight, semi-adjustable.
- Electrogalvanized body and hardware.
- 2⅞" deep box body—extra capacity for junction box use.
- Shipped complete with expandable cap to prevent ingress of concrete during pour.
- ½" through 1¼" knockouts for maximum utility.
- Uses P90 Series mop tight covers.

### Multiple Gang Floor Boxes for Single and Duplex Receptacles, Communications and Data

640 and 840 Series Floor Boxes provide flush service for power, communications and data. Multiple gang boxes allow the user to place high and low voltage in a single floor box. Floor boxes up to four gangs are available. 640 and 840 Series boxes can be used for either carpet or tile applications and provide the features listed below.

#### Features – 640 Series

- Cast iron, watertight body, fully adjustable.
- Painted silver enamel inside and out for additional corrosion resistance.
- Interior and exterior leveling screws permit adjustment to finished floor.
- Removable partitions for large capacity requirements on 2, 3, and 4 gang.
- Shipped complete with expendable cap to prevent ingress of concrete during pour.
- 3/4" threaded conduit openings are standard.

- Uses P64 Series mop tight covers (one cover per gang).
- For brushed aluminum, add AL after catalog number.

#### Features – 840SC Series (Shallow Type)

- Cast iron, watertight body, semi-adjustable.
- Painted silver enamel inside and out for additional corrosion resistance.
- Exterior leveling screws for adjustment to finished floor.
- Removable partitions for large capacity requirements on 2 and 3 gang.
- Shipped complete with expendable cap to prevent ingress of concrete during pour.
- 3/4" threaded conduit openings are standard.
- Uses P64 Series mop tight covers (one cover per gang).
- For brushed aluminum, add -AL after catalog number.

### Steel City® 740 Series Steel Floor Boxes

The new 740 series line of stamped steel floor boxes are an extension of T&B's industry leading 640 and 840 series cast iron floor boxes. The new boxes provide flush service for power, communications and data. Multiple-gang boxes allow the user to place high and low voltage in a single floor box. The 740 series can be used for carpet or tile applications.

#### Features

- Available in shallow (2 $\frac{5}{8}$ " ) and deep (3 $\frac{5}{8}$ " ) versions.
- U.L. listed and CSA certified.
- Available in one, two, and three-gang versions.
- Two and three-gang boxes are supplied with customer installed dividers.

- 16 ga. pre-galvanized steel construction.
- Adjustable with four exterior leveling legs capable of 2" pre-pour adjustment and an interior leveling ring capable of 1/4" after-pour adjustment.
- Made with a variety of k.o.'s ranging from 1/8" to 1/4".
- Boxes utilize the 640P series metallic and nonmetallic floor box accessories with the unique one-step installation method.
- Shipped with expendable steel cap to prevent ingress of concrete at installation.

68-P

The Nonmetallic Floor Box is prepackaged with concrete cap and six hub plugs.

68-PAR

• Nonmetallic adjusting ring includes pigtail and clips.

68P-FL/68P-FL-AL

Tile trim rings are available in brass or aluminum for flush installation of metallic plates in linoleum, wood or carpeted floors. Must be used to mount P60 series plates. (not required for P-68 covers, P60-CACP, or P60-3/4-2-CACP)

### 68-P Nonmetallic Floor Box

The 68-P floor box provides flush service for power or communications and data. The nonmetallic floor box is used in concrete floors and is suitable for carpet, tile, or wood applications.

- High-strength rigid PVC construction, non-corrosive.

- Easy installation with no leveling required – just cut the box level with the concrete after the pour.
- Compatible with standard schedule PVC conduit (1", 3/4" and 1/2", reducers included.)

### 68-P Round Nonmetallic Floor Box

### 640P Series Nonmetallic Floor Boxes

#### Features

- Significant savings over metal boxes.
- Die-cast adjusting ring with unique "snap-on" feature which eliminates gluing.
- Reduced installation time; no leveling required.
- Compatibility with standard schedule PVC conduit; 1", ¾" and ½".
- Removable Adjusting ring accepts wide variety of service accessories.
- One-piece housing unit with pre-molded conduit holes.
- Molded from a high-grade polymer material which is fully compatible with standard schedule PVC conduit.
- 640P Series Floor Boxes utilize both plastic and brass carpet (P64 series) plates and covers.
- Available in one, two, and three gang versions. Two and three gang boxes provided with partitions in corresponding activation kits
- Min. concrete pour 2½".

### Microphone Adapter for Floor Boxes

Cat. No.	Description	Std. Ctn.
489-MA	27-ga. galvanized steel with 1¼" dia. opening for standard microphone jacks: for Steel City® Floor Box Series 78, 88, 98, and 671	4

Standard package 54.  
Approximate weight 6 lbs. per C.

489-MA  
1¼" dia.

#### For Mounting Microphone Jacks in Floor Boxes –

The Microphone Adapter installs easily in the Steel City® Floor Box Tops and accommodates the microphone connector and locknut. The adapter is recessed to hold the microphone receptacle in position below the floor plate. Standard Floor Box Floor Plates, with removable 2" insert permits access to the receptacle (jack) for the microphone plug.

### Sample Assemblies

### Standard Specification – FB Floor Boxes

#### Cast Iron Formed Steel

Considerations when writing specifications:

Floor boxes are manufactured in various sizes, configurations and materials. The specifier should determine the most suitable product for his application. Refer to the T&B floor box catalog and select the appropriate paragraphs listed below. Plans should supply wiring capacity, conduit sizes, adjustability and floor finish. Construction Specifications Institute (CSI) references sections: 16132 Floor Boxes; 16141 Wiring Devices; Part 2-206 Floor Mounted Service Fittings; and 16741 Telephone Raceway Systems, Part 2-201 G Floor Boxes. Section 16132 Floor Boxes is preferable.

#### PART 2: PRODUCTS

##### 2.01 ACCEPTABLE MANUFACTURERS – FLOOR BOXES

- A. Shall be as manufactured by Thomas & Betts, Memphis, TN

##### 2.02 MATERIALS – FLOOR BOXES

###### 2.02.1

- A. Shall be cast iron, painted inside and out with weatherproof paint intended for use on metal as indicated on the plans.

###### 2.02.1

- B. Shall be formed steel with a zinc or cadmium plating at least .0005 in. thick on the outside and .00015 in. thick on the inside as indicated on the plans.

###### 2.02.2

- A. Construction shall be as required by U.L. 514A.

###### 2.02.2

- B. Carpet or tile frame shall be (brass, aluminum, polycarbonate, nylon).

###### 2.02.2

- C. Cover assembly shall protect against the ingress of water or foreign material with a gasket and shall be U.L. listed as moptight.

#### 2.03 GENERAL DESIGN – FLOOR BOXES

- A. Shall deliver electric power from receptacles installed at the surface of the floor or from service fittings (Reference 16141 as shown on the plans).
- B. 640/840 Series shall deliver power and telephone/data cable without interference from electric power delivery (see Section 16741).
- C. Cubic inch capacity shall be as shown on the plans.
- D. Boxes shall accept conduit sizes as required on the plans.
- E. Shall be listed by Underwriters' Laboratories.

#### PART 3: EXECUTION

##### 3.01 GENERAL

- A. Locate position for floor boxes and runs of conduit as shown on the plans.

##### 3.01 INSTALLATION

- A. Position floor boxes and conduit runs.
- B. After concrete pour, pull wires and install devices according to manufacturers recommendations.
- C. Activate in accordance with the National Electrical Code.
- D. Coordinate with floor covering contractor to complete installation.

### Standard Specification- CSFB Concealed Service

#### Service Floor Outlet Multiple Service, Power and Communications

Considerations when writing specifications:

The 664 Concealed Service Floor Box provides both electric power and telephone (data) services from the same device for economy of space and cost, as well as affording a flush delivery (no above floor service fitting). For these reasons, your specification may reference this product in three sections; Floor Boxes, Wiring Devices, and Telephone Raceway Systems. Construction Specifications Institute (CSI) references them in: 16132 Floor Boxes; 16141 Wiring Devices; Part 2—2.06 Floor Mounted Service Fittings; and 16741 Telephone Raceway Systems, Part 2—2.01 G Floor Boxes. Section 16132 Floor Boxes is preferable. For clarification include a reference in 16141, Part 2, 2.06 Floor Mounted Service Fittings as follows: Surface type service fittings are not acceptable.

#### PART 2: PRODUCTS

##### 2.01 ACCEPTABLE MANUFACTURERS—FLOOR BOXES, MULTIPLE SERVICE.

- A. Shall be series 664 concealed service floor box as manufactured by Thomas & Betts.

##### 2.02 MATERIALS—FLOOR BOXES, MULTIPLE SERVICE.

- A. Shall be electrogalvanized, 14 gauge sheet steel. (Alternate A shall be cast iron).
- B. Construction shall be as required by U.L. 514A.
- C. Carpet frame shall be nylon U.L. Recognized Component QMFZ2.
- D. Hinged outer cover shall be reinforced with a 5/32" steel plate.

### 2.03 GENERAL DESIGN – FLOOR BOXES, MULTIPLE SERVICE.

- A. Shall deliver electric power from one or two duplex receptacles installed below the surface of the floor.
- B. Shall deliver telephone or data cable without interference from the electric power delivery.
- C. Shall protect delivery of both services by a hinged cover with a retractable opening and foam plastomer dust seal.
- D. Hinged cover shall accept carpet or tile to match floor covering and be 180 degrees reversible.
- E. Shall have 90 cubic inch total capacity with 24 cubic inch power chambers.
- F. Shall accept conduit sizes up to 1¼ inches.
- G. Shall afford 18 square inches of access with cover open.
- H. Box shall be listed by Underwriters Laboratories.
- I. When hinged cover is closed and no services in place, device shall have no obstructions above surface of floor.

### PART 3: EXECUTION

#### 3.01 GENERAL

- A. Locate position for floor boxes and runs of conduit as shown on the plans.

#### 3.02 INSTALLATION

- A. Position floor boxes and conduit runs.
- B. After concrete pour pull wires and install devices according to manufacturers recommendations.
- C. Activate in accordance with the National Electric Code.
- D. Coordinate with floor covering contractor to complete installation.

### Standard Specification – SFH Service Fitting Heads

#### Polished Brushed Aluminum Finish

Considerations when writing specifications:

Service fitting heads are manufactured in various sizes, configurations and materials. The specifier should determine the most suitable product for his application. Refer to the T&B floor box catalog and select the appropriate paragraphs listed below. Construction Specifications Institute (CSI) references sections: 16141 Floor Mounted Service Fitting Heads, Wiring Devices; 16741 Telephone Raceway. Section 16141 is preferable.

### PART 2: PRODUCTS

#### 2.01 ACCEPTABLE MANUFACTURERS – SERVICE FITTING HEADS

- A. Shall be manufactured by Thomas & Betts, Memphis, TN.

#### 2.02 MATERIALS – SERVICE FITTING HEADS

- A. Shall be brushed aluminum.

#### 2.03 GENERAL DESIGN – SERVICE FITTINGS

- A. Shall deliver electrical power from receptacles as designated on the plans.
- B. Shall deliver telephone/data through precut bushed opening.
- C. Shall be furnished standard with required receptacles.
- D. Shall be furnished standard with conduit nipple for direct screw threading into Thomas & Betts cover assembly.
- E. Shall be listed by Underwriters Laboratories.

### PART 3: EXECUTION

#### 3.01 GENERAL

- A. Locate position for floor boxes and runs of conduit as shown on the plans.

#### 3.02 INSTALLATION

- A. Position floor boxes and conduit runs.
- B. After concrete pour, install service fitting heads, pull wires and install devices according to manufacturer's recommendations.
- C. Activate in accordance with the National Electrical Code.
- D. Coordinate with floor covering contractor to complete installation.

## Access Floor Modules

Steel City® Access Floor Modules from Thomas & Betts eliminate the clutter of power, voice, and data lines by keeping everything out of sight but conveniently close at hand. Our easy-to-install Access Floor Modules are designed to blend with any decor, while providing the durability and versatility you need to meet the growing demands of today's high-tech offices.

You can use our Access Floor Modules with virtually any type of raised floor, including ridged or waffled floor panels, carpet or tile floors. Our system is designed to provide a simple, strong, and adaptable solution to even the most demanding wire management needs.

### **Range Of Box Sizes Designed to Meet The Needs Of Any Application. Now And Later.**

With five sizes to choose from, our Access Floor Modules handle a broad range of wiring needs, from single power lines to complex data and voice systems. In fact, our largest unit offers 325 cu. in. of space, making it the roomiest in the industry. And because our modules are easy to install and relocate, you can easily change box sizes or reposition modules as office configurations change.

### **New, Low-Profile Box Fits Right In With Shallower Raised Floors.**

For installations where shallower raised floors are needed, Thomas & Betts has developed a low-profile Access Floor Module to provide the same accessibility and convenience where space is at a premium. Just 2½ inches deep, it can still accommodate a variety of power, voice, and data connections.

### **Wide Variety Of Interchangeable Power and Data Panels Adapt To Changing Demands.**

Our extensive line of panels and connection devices maximizes the versatility of our Access Floor Modules. All our panels are designed to be easy to connect, disconnect, and rearrange to reduce on-site installation time. And Thomas & Betts is continually developing new configurations to meet the requirements of virtually any installation, especially for the fast-growing needs of voice and data communication.

### **Durable, Solid Steel Covers Support Heavy Loads To Protect Important Connections.**

We've reinforced the resilient nylon covers of our modules with a 5/8" steel plate, to prevent buckling under heavy furniture and equipment. The beveled sides allow for quick and unobstructed installation in the raised floor.

In addition, our retractable exit not only helps prevent tripping but protects cable connections by sealing out dust and debris. And, as with all Thomas & Betts products, our Access Floor Modules are constructed to meet your high standards for durability, safety, and reliability.

### **Steel City® Access Floor Modules Provide Outstanding Performance Without Standing Out.**

The hinged service top on our modules sits flush with the floor and provides complete access to the connections within. The nylon frame comes in gray, brown, beige, and black; and it accepts field-installed carpets or tile, as well as factory-provided high-pressure laminate inserts for specific project requirements.

Our Access Floor Modules keep wire connections close-at-hand but not under foot. The widest variety of box sizes, panels, and devices in the industry provides exceptional versatility for changing office needs.

Look below the surface and see how Steel City Access Floor Modules can manage all your power, voice, and data connections. Today and tomorrow.

### Standard Specification – GAB Series Access Floor Box Pre-Set Insert

Considerations when writing specification:

The installation of access floor box pre-set inserts must be in compliance with the National Electric Code. These specifications may be used in three sections of the Construction Specification Institute (C.S.I.) format: 16132 Floor Boxes; 16141 Wiring Devices; and 16741 Telephone Raceway Systems. For accuracy, 16132 is preferred.

#### PART 2: PRODUCTS

##### 2.01 PRE-SET INSERT

- A. Shall be GAB Multiple Service Floor Outlet Assembly as manufactured by Thomas & Betts, Memphis, TN, (trade name, Steel City) consisting of:
1. Pre-set insert, Series GAB.
  2. Activating unit, Series AFM-4 and AFM-6.
- B. See Electrical Section for approved suppliers of power and cable systems.

##### 2.02 MATERIALS

- A. Cast-iron components to be gray iron per ASTM Specification A48, Class 20A.
- B. Cast-iron components shall be protected with a painted coating as specified in U.L. 514A.
- C. Steel components to be fabricated from cold rolled steel, .070 inch minimum thickness, conforming to ASTM A366.
- D. Steel components to have an electrogalvanized zinc finish conforming to ASTM A386. Sheet metal steel fabrications shall be made of U.L. approved component G-90-U material.

- E. Nonmetallic components shall be glass-filled polyimide nylon, U.L. recognized component QMFZ2.

##### 2.03 GENERAL DESIGN GAB SERIES

- A. The GAB series shall consist of pre-set insert, activation unit and cover for the distribution of electrical power and data/communication signal systems.

##### 2.03.1 PRE-SET INSERT

- A. Following sizes as shown on the drawings:
1. 8" x 8" nominal concrete opening. (Ref.: Steel City GAB-4)
  2. 8" x 10" nominal concrete opening. (Ref.: Steel City GAB-6)
- B. Overall size:  
8" x 14" x 4 $\frac{3}{16}$ " high.
- C. Shall be installed with conduit sizes as shown on the drawings. (Note: Standard  $\frac{3}{4}$ " conduit thread on power side, in and out. Standard  $1\frac{1}{4}$ " conduit thread on data side, in and out. Special drilling and tapping up to  $1\frac{1}{2}$ " conduit size. Reducing bushings may be used to downsize conduit.)
- D. Conduits for power shall enter and leave in-line and on same side so as to maintain separation of services.
- E. Foam blocks shall exclude concrete from the interior.
1. Foam blocks shall permit a minimum of  $1\frac{1}{4}$ " of concrete over opening prior to activation.
  2. Foam blocks shall be manufactured for the intended purpose.

##### 2.03.2 ACTIVATION UNIT

- A. Following sizes shall match pre-set insert opening as shown on drawings.
1. 8" x 8" nominal size steel box (Ref.: Steel City AFM-4). Provides a minimum interior capacity of 150 cubic inches.
  2. 8" x 10" nominal size steel box (Ref.: Steel City AFM-6). Provides a minimum interior capacity of 225 cubic inches.

- B. Device panels may be data or telephone as shown on drawings.
- C. If two duplex power receptacles are required on a single panel, the pre-set insert and activation unit shall be Steel City GAB-6 and AFM-6 respectively.
- D. Data panels shall be designed to mount the data connectors and telephone connectors as shown on the drawings.
- E. Cover shall be (gray, brown, black or beige) as specified on the drawings.
1. Shall accept floor covering material as required.
  2. Shall be self-leveling when installed.
- F. Cover, when closed, shall protect exiting cables and cords from abuse and abrasion by retractable cable exits. Cover shall install flush with floor and be 180° reversible.
- G. Carpet edge shall be protected from fraying by a carpet trim ring of a matching color.

#### PART 3: EXECUTION

##### 3.01 GENERAL

- A. All pre-set inserts shown on the drawings shall be installed with the specified runs of conduit.
- B. Wire-pulling cords shall be in place in the conduit prior to pouring concrete.
- C. Activate only the pre-set inserts as directed by the supervising engineer or owner.
- D. Install and activate the assembly as directed by the manufacturer's installation instructions.

### Recessed Poke-Throughs

Thomas & Betts introduces the Recessed Poke-Through (RPT) series, the only poke-through to provide “recessed” power and communication services. These poke-through devices provide the complete protection of receptacles and jacks from impact and abuse. Available in three configurations: quad power receptacle with two communication ports, duplex power with four tele/data ports and a communication poke-through device with six ports. The quad configuration is the only two circuit poke-through on the market, allowing greater flexibility for dedicated wiring needs. The attractive brass and aluminum covers provide unmatched good looks. The communication outlets permit an open architecture use with “keystone®” jack openings for your data needs.

### RPT Series Floor Box

#### Features and Benefits:

- Available in three configurations.
  - Quad power with two tele/data ports.
  - Duplex power with four tele/data ports.
  - Six tele/data ports only no power.
  - Provides unparalleled flexibility for Poke-Through fittings.
- Quad configuration comes standard with two 20-A circuits.
  - Only Poke-Through on the market with two circuit capacity.
  - Allows greater flexibility for dedicated wiring requirements.
  - Can be wired for isolated ground service.
- Available with metallic brass or aluminum covers.
  - Covers are 100% metallic –not metallic /plastic combination or plated plastic.
  - Provides unmatched aesthetics, durability and strength.
- Only Poke-Through in the industry to provide “recessed” service.
  - Greatly increases aesthetics of unit while not in use.
  - Provides additional protection of devices from dirt and debris.
  - Complete protection of devices and connectors from impact.
- Tele/data outlets punched for “keystone®” configuration.
- Base unit utilizes “One- Step” activation method.
  - Provides tremendous labor savings at installation.
  - Temporary cover allows installation early in construction phase with finish cover assembly to follow after carpet installation.
- Devices are pre-wired at the factory.
  - Eliminates additional wiring by the installer.
- Junction box factory assembled to 6" long ½" EMT conduit.
  - Conduit can easily be changed for different slab depths.
  - Junction box is supplied with 5½" & 5¾" ko's.
- Bottom of base unit threaded for conduit on low voltage side.
  - 1" conduit can easily be added for low voltage applications where local codes require or security is necessary.
- Base unit provides up to 2 hour fire rating in concrete on deck and concrete slab floors.
- 4" core drill required.

## Modular Poke-Through System

D

Steel City®

### **More Options Means The T&B Steel City® Poke-Through System Fits In Everywhere Today. And Tomorrow.**

With more materials, colors, and port combinations to choose from, the T&B Steel City® Poke-Through System gives you the flexibility you need to meet the demands of changing office environments now and in the future. Our Poke-Through accepts both flush-profile covers and above-floor assemblies. The Steel City® Poke-Through's design also makes retrofitting a snap.

Choose from a wide variety of metallic and nonmetallic covers and service head fittings to perfectly suit your particular application. Whether using a pre-wired power version or a combination service fitting, the Steel City® Poke-Through System will make installation quick and easy and offer the maximum flexibility to adapt to your changing needs.

### **Features Of The T&B Steel City® Poke-Through System.**

- Stainless steel retaining clips prevent rotating, loosening and backing out of lower unit.
- Factory assembled junction box allows "drop-in" installation, significantly reducing labor and installation time.
- 27 cu. in. junction box capacity allows up to 12 #12 AWG conductors.
- Junction box designed with five 1/2" and five 3/4" KOs provide flexibility when installing lower unit. Bottom 3/4" KO allows field adaptability to any floor thickness with use of standard conduit and fittings.
- Low voltage channel equivalent to 1 1/4" conduit capacity provide the largest capacity for low voltage cables in the industry. Low voltage channel will accept up to one 50 pair, 24 AWG cable.
- Elastomer ring provides cold smoke protection at installation.
- Universal mounting system unit allows changes to service fittings without removing lower unit.
- Nonmetallic flush covers available in five designer colors. Furnished with duplex flip lids and three data ports.
- Nonmetallic furniture feed covers provided with two 1/2" and one 3/4" tapped hub and fittings. Available in five designer colors.
- Metallic flush covers available in brushed aluminum and polished brass. Furnished with locking flip lids for use with with power or voice/data devices.
- Low profile Designer Series service fittings (DLP- Series) available in single and double power configurations along with combinations providing both power and communications. Available in gray, ivory or beige.
- Built-in slide covers (DLP- Series) protect and enhance the pedestal's appearance while opening easily.
- Communication compartment lid flips open when in use and close when not in use (DLP- covers only).
- Standard metallic service fittings made from cast aluminum with a brushed aluminum finish. Available in single, two and four gang configurations.
- Brushed aluminum face plates face plates are ordered separately, allowing customization for particular applications. See reverse for full description of available service plates.
- The Steel City® Poke-Through is fully U.L. listed and classified for one to four hour rated floors. The intumescent fire-retardant material expands up to seven times its volume to close power and data raceways in case of fire.

### FPT Poke-Through Accessories

Cat. No.	Description	Std. Ctn.
<b>FPT410A</b>	Abandonment Plug for 3" Holes	1
<b>FPT415</b>	Temporary Abandonment Kits for Base Units	10

### Above-Floor Service Fittings

Cat. No.	Description	Std. Ctn.
FPT401A	Single Unit – accepts two face plates	10
FPT421	Double Unit – accepts four face plates	5
FPT430	Quad Unit – accepts eight face plates	1

**FPT401A**  
(Shown with FPT 424 Faceplate)

**FPT421**

**FPT430**

### Faceplates for Service Fittings

Cat. No.	Description	Std. Ctn.
FPT423	Communication Faceplate	50
FPT424	Power, Std. Duplex Faceplate	50
FPT425	Blank Faceplate	50
FPT426	Combination Faceplate – token ring data and voice	10
FPT427	Radiator kit for 50PR Telephone Cable	10
FPT428	Single Jack Faceplate	50
FPT429	Double Jack Faceplate	50

### Accessories for Service Fittings

Cat. No.	Description	Std. Ctn.
FPT408A	Low Voltage Separator – single unit	10
FPT422A	Low Voltage Separator – double unit	10
FPT416	Adapter for conduit stub ups	50
FPT410A	Abandonment Plug fits 3" holes	1
FPT415	Temporary abandonment kits for lower units	10

### Standard Specification – FPT Poke-Through

#### Service Fitting Fire-Rated

Considerations when writing specifications:

Fire-rated poke-through service fittings are special purpose devices that are furnished as an integral unit, consisting of a service fitting, poke-through device and an outlet box. They are classified for fire resistance by Underwriters Laboratories when installed in accordance with installation instructions provided with the product. When properly classified and used, they will not reduce the fire rating of concrete or steel and concrete floors that have fire resistance ratings as classified by the Fire Resistance Directory of Underwriters Laboratories. Poke-through service fittings provide service for both power and telephone (data) needs. As such, they may appear in your specifications as a power service fitting, telephone service fitting or floor box. The Construction Specifications Institute (CSI) reference three sections; Section 16141 Wiring Devices, Part 2, 2.05 and 2.06; Section 16741 Telephone Raceway System, Part 2, 1.012 G; Section 16132 Floor Boxes, Part 2. The preferred is Section 16141 Wiring Devices.

#### PART 2: PRODUCTS

##### 2.05 ACCEPTABLE MANUFACTURERS—FIRE- RATED, POKE-THROUGH SERVICE FITTINGS.

A. Shall be the Poke-Through series as offered by Thomas & Betts—Catalog FPT Series.

##### 2.06 GENERAL DESIGN—FIRE RATED, POKE-THROUGH SERVICE FITTINGS.

- A. Shall be U.L. classified for use in up to four hour rated concrete floors, and up to three hour rated steel and concrete floors.
- B. Shall be U.L. listed for use with power and telephone (data) in a single service fitting and shall protect against ingress of water or foreign material with a neoprene gasket at base of fitting.
- C. Shall be installed in a single 3" core drilled hole.
- D. Shall be self-locking type insert such that no screws are used to secure device in hole.
- E. Shall permit use with "H" cut opening in carpet so carpet can be restored if position is vacated.

- F. Shall have interchangeable service fitting accessories including hinged guard and IBM cabling data support.
- G. Service fitting head shall be as specified.
- H. Shall accept one 100 pair, one 50 pair, or two 25 pair cables with space to insert an uncoupled 25 pair amphenol connector through communication raceway.
- I. Shall accept 12 No. 12 AWG power conductors.

#### PART 3: EXECUTION

##### 3.01 INSTALLATION

A. Core drill openings for poke-through service fitting and install in accordance with manufacturers instructions.

Note: minimum spacing of 2 feet on center and not more than one unit per each 65 square feet of floor area in each span. Required by Fire Resistance Directory.

### Standard Specification- RPT Poke Through

#### PART 1: Consideration when writing specifications

Fire-rated poke-through service fittings are special purpose devices that are furnished as an integral unit, consisting of a service fitting, poke-through device and an outlet box. They are classified for fire resistance by Underwriters Laboratories, Inc. when installed in accordance with installation instructions provided with the product. When properly classified and used, they will not reduce the fire rating of concrete or steel and concrete floors that have fire resistance ratings as classified by the Fire Resistance Directory of Underwriters Laboratories. Poke-through service fittings provide service for both power and communication cabling needs. As such, they may appear in your specifications as power service fittings, telephone service fitting or floor box.

The Construction Specifications Institute (CSI) references three sections:

Section 16141 Wiring Devices, Part 2, 2.05 and 2.06

Section 16741 Telephone Raceway System, Part 2, 2.012 G

Section 16132 Floor Boxes, Part 2

#### PART 2: PRODUCT

##### 2.1 MANUFACTURER

The poke-through devices specified herein shall be the Recessed Poke-Through Devices (RPT Series) as manufactured by the Thomas & Betts Corporation. Systems of other manufacturers may be considered equal if, in the opinion, and the written approval of the engineer, meet all the performance standards specified herein.

##### 2.2 MATERIALS

2.2.1 Poke-through service fittings shall be UL classified for use in up to a two-hour fire rating in concrete on steel deck and concrete slab floors. The poke-through service fittings shall be UL listed for use with power and communication (telephone and data) services in a single fitting.

2.2.2 Shall provide "recessed" service for power outlets and communication jacks with protective solid brass or anodized aluminum covers. The device shall be installed in a single four inch (4") core drilled hole by means of a self-locking type insert such that no screws are used to secure the device in the hole.

2.2.3 The "Quad" version double duplex style shall be wired with two 20A 120V circuits. The device shall have six #12 THHN conductors, capable of being wired for dedicated isolated ground services as needed.

2.2.4 Base unit shall be threaded for 1/2" conduit one the power side and 1" conduit on the low voltage side, enabling the conduit length to be changed for different slab depths.

2.2.5 All units must be capable of mounting Thomas & Betts Omni 110 style jacks and/or keystone-style jacks in a single housing. Additional communication adapters forcoaxial, ST and SC fiber, and F connectors must be available.

#### PART 3 - EXECUTION

##### 3.1 INSTALLATION

Core-drill openings for poke-through service fittings and install in accordance with manufacturer's instructions. Note: minimum spacing of 2 feet on center and not more than one unit per each 65 square feet of floor are in each span, required by Fire Resistance Directory.
