

# **MITSUBISHI**

## MAGNETIC MOTOR STARTERS AND MAGNETIC CONTACTORS

# MS-Nseries

Performance with a refined new design and functional beauty

(Note) This mark indicates EC Directive Compliance.  
Products with the CE mark can be used  
for European destinations.

Mitsubishi Electric Corporation Nagoya Works is a factory certified for ISO14001 (standards for environmental management systems) and ISO9001 (standards for quality assurance management systems)

# Substantial safety and functionality realized with a full lineup

## Incorporation of CAN terminal for simple wiring

By adopting a CAN terminal, there is no need to remove the screws, and losing of the terminal screw is prevented by the integrated screw holder and terminal screw. The terminal screw is set in a plastic screw holder. When each pole is moved and the screw loosened, the screw is naturally set in the screw holder. This is Mitsubishi's original CAN terminal. (Patented) (S-N10CX~N35CX, SD-N11CX~N35CX, SR/SRD-N4CX)

## Unified design for N series

The design has been unified for the MS-N series. The front face of the product is a bright white color, making the inside of the panel brighter and providing a clean image.

## Arc space reduced to approx. one-third!

By adopting the new extinguishing mechanism, the arc space has been reduced to approx. 1/3 (Mitsubishi comparison).

## Compatible with International Standards

Most of Mitsubishi's standard products comply with International Standards.

Applicable standards: JIS, JEM, IEC, EN, VDE, BS  
Approved standards: UL, CSA, LR, BV, NK, KR, TÜV

## Small-Sized Models S-N10~N35

### Simple installation and wiring

The MS-N series contactors, starters and relays can be installed on a mounting rail (35mm width). The terminals of these coils are arranged on the contactor with simple wiring. Furthermore, the distance between the center of the rail and the coil terminals is unified at 38.5mm. (S-N10 to N21, MSO-N10 to N21 and SR-N4)

### Simple inspections

The contactor can be inspected easily by removing the arc cover.

### Built-in surge absorber

The model with built-in surge absorber for coils is obtainable as an option.

### CAN terminal realizes safety and speedy

The models with finger protection are safer and speedier even if the lug of a closed type eyelet (ring) terminal plate is used. (S-N10CX~N35CX, SD-N11CX~N35CX, SR/SRD-N4CX)

Stronger barrier strength is improved with the thermoplastic mold.

### Improved magnet

By using a spiral kick-out spring, the dynamic balance of the moving parts is improved, bouncing is reduced, and the core life is extended. Furthermore, the core movement is generally stabilized. The efficient magnet has been achieved through modern technology of the magnet section using a computer. The contactor has a performance to withstand a voltage drop to 35% with the closed contact.

## Medium-and Large-Sized Models: S-N50~S-N800

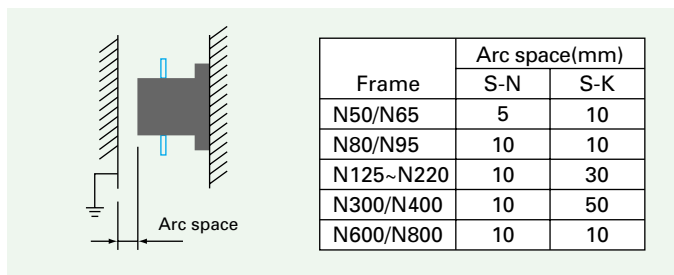

### Finger Protection Compatible

An easy-to-install terminal cover, which lays importance on further safety and is compatible with finger protection, has been prepared.

### The arc blowoff direction has been changed to further improve safety and space conservation

A new extinguishing structure, which eliminates the blow off of hot gas (arc) to the front (direction to door of control panel) when the current is cutoff has been incorporated.

In addition to improved safety, the freedom of panel design has been increased allowing space to be saved.

## DC Electromagnet with AC Operation (Patented)

### Lower Power Consumption

Coil power consumption is greatly low so MS-N Series contactors can be controlled by almost any type of relay, even small output relays of programmable controllers.

### Less Noise nor Surge from Coil

When switching a coil, the energy will be desipated within internal circuit of electromagnet

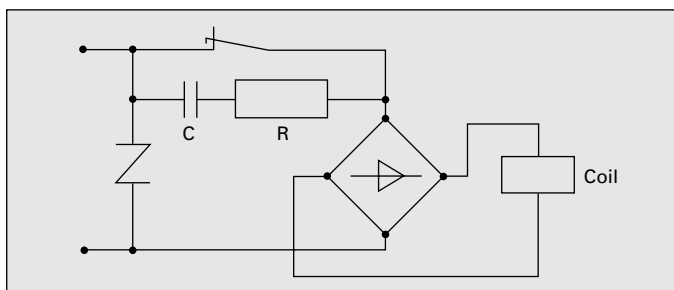

### Humming Completely Eliminated

DC excitation does not cause humming so operation is quiet.

### Contactors Coils Have Ultra-Wide Range of Ratings

The number of coil types has been cut by two-thirds and there is no need to re-wire for different frequencies. The coil also withstands large voltage drops.

Internal circuit of the electromagnet

## MATCH WITH ELECTRONIC CONTROL FOR FACTORY AUTOMATION

### One-touch surge absorber

If the magnetic relay coil is opened and closed near an electronic circuit, malfunctioning of the electronic circuit could be induced by a surge voltage. The UN-SA type surge absorber suppresses the surge voltage when this coil is opened and closed. In

addition to the general varistor type and the CR type that lays importance on suppressing the induction voltage when starting, the type with operating indicator (varistor type), and the varistor type with CR are available.

### Auxiliary contact unit with low level contact

This is an auxiliary contact unit with low level contact, capable of opening and closing the low voltage and minute current of the electronic control circuit. It can be installed with one touch onto the magnetic contactor or magnetic relay that opens and closes the power of the motor, etc. The junction relay for opening and closing the low voltage and minute current is not needed, so this unit is suitable for opening and closing electronic input circuits in programmable logic controllers, etc. A compact microswitch is used for the low level contact, so the unit will not malfunction due to fields and surge voltages from the main circuit current and coil of the magnetic contactor.

A 1NO+1NC low level contacts and 1NO+1NC standard contacts are built-in, so the opening and closing of 200VAC and 24VDC can be handled with one unit.

### Interface unit

#### ◆2 types of inputs

The long life no-contact output type (UN-SY21, SY31) and contact output type (UN-SY22, SY32) are available.

#### ◆One touch installation

The UN-SY21, SY22, SY31 and SY32 types can be mounted with one touch onto the coil terminal. Post-installation work is easy.

#### ◆Single standalone unit

A single unit installation type (UN-SY11, SY12) is available for the S-KR11 and S-N80 to N400 magnetic contactor.

### Direct installation is possible on the following units:

**S-N series (Magnetic contactor) 65A frame or less**  
**SR-N series (Magnetic relay) 4-pole, 5-pole and 8-poles types**

## Even Greater Contact Reliability

Contact reliability has been greatly improved by the bifurcated auxiliary moving contact

# 1. GENERAL PURPOSE CONTACTORS & STARTERS

Series MS-N

## 1.1 Conformity to International Standards

Mitsubishi magnetic motor starters and contactors are designed to conform to the relevant IEC recommendations and to the standards of as many countries as possible. Specifically, they conform to the following:

IEC60947-4-1 International  
EN60947-4-1 Europe

VDE0660 Germany  
NEMA-ICS U.S.A

Table 1.1

Notes: 1. Standard models are applicable under following conditions.

Main circuits : AC-3 rated current at 440V AC max.

(Main contacts) and rated continuous current.

Auxiliary contacts : AC-15 rated current at 550V AC max. and rated continuous current.

Operation coil : AC coil designation  
N10~N12, N18~N48 and SR-N4 ; AC12V~AC440V  
N20~N35 ; AC12V~AC380V  
N50~N150 ; AC24V~AC500V  
N180~N400 ; AC48V~AC500V  
DC coil designation DC12V~DC220V

2. For contactors, standard models are with TÜV mark on the product.

For other products, standard models are with no TÜV mark on the product.

For contactor relays, order model name followed by suffix "DZ" if TÜV mark on the product is required.

3. Finger protection type is certified according to DIN VDE 0106 part 100. For finger protection type, order model name followed by suffix "CX".

4. Models with built-in surge absorber (model name followed by "SA") are also certified.

Main terminal (overload relay)		mm <sup>2</sup>	1-2.5	1-2.5	1-6	1-6	1-6	2-16	2-16	2-25	2-25	
Control terminal		mm <sup>2</sup>	1-2.5	1-2.5	1-2.5	1-2.5	1-2.5	1-2.5	1-2.5	1-2.5	1-2.5	
Busbar width		mm	—	—	—	—	—	—	—	—	—	

Notes: 1. 660A at ambient temperature 40-55°C.    2. 800A at ambient temperature 40-55°C.  
3. Conductor size in parentheses indicate compression terminal style not for bare clamping.  
4. The peak value of inrush current should be less than 2000% of the effective value for rated current of capacitors.  
The selection is invalid for the circuit of parallel capacitors which are controlled individually.

## 1.4.2 Performance of Series S-N Contactors

### Electrical Life

The electrical life of the main contacts of a contactor is determined mainly by the circuit-opening duty it will perform. The relationship between electrical life and rated current of Mitsubishi contactors under normal and jogging duties of squirrel-cage motors is shown in Fig. 1.4.2(1) and 1.4.2(2). In the case of a mixture of normal and jogging duties, the expected contactor life can be determined as follows:

$$N = N_r / 1 + \frac{\alpha}{100} (N_r / N_i - 1) \dots\dots\dots \text{Eq.1.1}$$

where  $N$  : Life in the case of  $\alpha\%$  jogging duty  
 $N_r$  : Life in the case of normal duty  
 $N_i$  : Life in the case of 100% jogging duty  
 $\alpha$  : Percentage of jogging duty

Electrical life versus rated operating current

— Normal duty, 6le on, 1e off, on-load factor 40%,  
 1200 operations/hour (AC3)  
 --- Jogging duty, 6le on, 6le off, on-load factor 7%,  
 600 operations/hour (AC4)-S-N10~S-N300  
 300 operations/hour (AC4)-S-N400~S-N600  
 150 operations/hour (AC4)-S-N800

## 1.4.3 Mounting Attitude of Starters and Contactors

To assure proper performance, Mitsubishi magnetic motor starters and contactors should be mounted on a vertical supporting surface with the line terminals upwards and the load terminals downwards. The supporting surface may have a maximum inclination of 30° from the vertical in any direction.

Regular installation

Inclined installation

# 1.5 When Ordering

**Contactors**, indicate the model name and the ordering designation of the coil.

Example: **S-N20 \*AC230V (\* 2A)**

**Overload relays**, indicate the model name and the ordering designation of the heater setting range.

Example: **TH-N400RHKP\*250A**

**Motor starters**, indicate the model name, heater setting range, main circuit voltage, coil designation.

Example: **MSO-N11KP\*6.6A\*380V\*AC230V**

*Note: Mark \* indicates a blank space.*

## Coil Ratings and Ordering Designations

for **S-N10(CX), -N11(CX), -N12(CX), -N18(CX), -N20(CX), -N21(CX), -N25(CX), -N35(CX)** and **SR-N(CX)**

Table 1.5.1

Rated voltage (VAC)		Ordering designation
50Hz	60Hz	
24	24	AC24V
48~50	48~50	AC48V
100	100~110	AC100V
110~120	115~120	AC120V
125~127	127	AC127V
200	200~220	AC200V
208~220	220	AC220V
220~240	230~240	AC230V
240~260	260~280	AC260V
346~380	380	AC380V
380~415	400~440	AC400V
415~440	460~480	AC440V
500	500~550	AC500V

for **S-N50(CX)~N800**

Table 1.5.2

Rated voltage (50/60Hz)	Ordering designation
100~127V	AC100V
200~240V	AC200V
260~350V	AC300V
380~440V	AC400V
460~550V	AC500V

AC24V, AC48V are available for S-N50(CX)~N150

for **SD-N, SRD-N**

Table 1.5.3

Rated voltage (VDC)	Ordering designation
24	DC24V
48	DC48V
100	DC100V
110	DC110V
120~125	DC125V
200	DC200V
220	DC220V

## Code of arrangement for sepcial aux. Contacts

Table 1.5.4

### • Coil Ratings (Closing & Tripping)

Table 1.6.3 (2)

Ordering designation	Applicable voltage
<b>AC100V</b>	100-127VAC 50/60Hz
<b>AC200V</b>	200-240VAC 50/60Hz
<b>AC300V</b>	260-350VAC 50/60Hz
<b>AC400V</b>	380-440VAC 50/60Hz
<b>AC500V</b>	460-550VAC 50/60Hz
<b>DC24V</b>	24VDC
<b>DC48V</b>	48VDC
<b>DC100V</b>	100-110VDC
<b>DC125V</b>	120-125VDC
<b>DC200V</b>	200-220VDC

### • Precautions

- Minimum energising time, both for closing and tripping must be set longer than the followings.  
 SL(D)-N21 to N220 : 0.3 sec.  
 SL(D)-N300 to N800 : 0.5 sec.
- Make sure never to over lap the energising time for closing and tripping.

**SL-N35**

**SL-N150**

## 1.6.4 Reversing Mechanically Latched Contactors

(Components for Automatic Transfer Switches)

Type **SL-2xN□**, **SLD-2xN□**, **SLxS-N□**

### Ordering Designation

- Mechanically latched & mechanically latched contactor

Model name ..... SL-2xN35

Closing coil designation in normal left side<sup>1</sup> ..... AC200V

Tripping coil designation in normal left side<sup>1</sup> ..... DC100V

Closing coil designation in standby right side<sup>1</sup> ..... DC100V

Tripping coil designation in standby right side<sup>1</sup> ..... AC200V

Complete type designation SL-2xN35\*MC1-AC200V\*MT1-DC100V\*MC2-DC100V\*MT2-AC200V

- Mechanically latched & normal contactor

Model name ..... SLxS-N150

Closing coil designation in normal left side<sup>1</sup> ..... AC200V

Tripping coil designation in normal left side<sup>1</sup> ..... AC100V

Coil designation in standby right side<sup>2</sup> ..... AC100V

Complete type designation SLxS-N150\*MC1-AC200V\*MT1-AC100V\*AC100V

Notes: Mark\*indicates a blank space.

### • Precautions

- Minimum energising time both for closing and tripping must be set longer than the followings.

SL(D)-2xN21 to N220, SLxS-N65 to N220 : 0.3 sec.

SL(D)-2xN300 to N800, SLxS-N300 and N400 : 0.5 sec.

Make sure never to overlap the energising time for closing and tripping.

SL-2xN35

## 1.8.7 Terminal Covers

Table 1.8.7

 <p><b>S-N50 with 2pcs of UN-CZ500</b></p>	For contactors	Contactor	Part Number	For starters	Starter (loadside)	Part Number
		S(D)-N50, -N65 <sup>3</sup>	<b>UN-CZ500<sup>1</sup></b>		MSO(D)-N50, -N65 <sup>3</sup>	<b>UN-CZ501<sup>2</sup> (+CZ500)</b>
		S(D)-N80, -N95	<b>UN-CZ800<sup>1</sup></b>		MSO(D)-N80, -N95	<b>UN-CZ801<sup>2</sup> (+CZ800)</b>
		S(D)-N125	<b>UN-CZ1250<sup>1</sup></b>		MSO(D)-N125	<b>UN-CZ1251<sup>2</sup> (+CZ1250)</b>
		S(D)-N150	<b>UN-CZ1500<sup>1</sup></b>		MSO(D)-N150	<b>UN-CZ1501<sup>2</sup> (+CZ1500)</b>
		S-N180, S(D)-N220	<b>UN-CZ2200<sup>1</sup></b>		MSO-N180, MSO(D)-N220	<b>UN-CZ2201<sup>2</sup> (+CZ2200)</b>
		S(D)-N300, -N400	<b>UN-CZ3000<sup>1</sup></b>		MSO(D)-N300, -N400	<b>UN-CZ3001<sup>2</sup> (+CZ3000)</b>
		S(D)-2×N50, N65	<b>UN-CZ502</b>		MSO(D)-2×N50, N65	<b>UN-CZ504</b>
		S(D)-2×N80, N95	<b>UN-CZ802</b>		MSO(D)-2×N80, N95	<b>UN-CZ804</b>
		S(D)-2×N125	<b>UN-CZ1252</b>		MSO(D)-2×N125	<b>UN-CZ1254</b>
		S(D)-2×N150	<b>UN-CZ1502</b>		MSO(D)-2×N150	<b>UN-CZ1504</b>
		S-2×N180, S(D)-2×N220	<b>UN-CZ2202</b>		MSO-2×N180, MSO(D)-2×N220	<b>UN-CZ2204</b>
		S(D)-2×N300, N400	<b>UN-CZ3002</b>		MSO(D)-2×N300, N400	<b>UN-CZ3004</b>

Notes : 1. 2pcs are required for one contactor

2. For line side another cover (for contactor) is required.

3. Terminal covers should not be mounted for type S-N50CX, S-N65CX, MSO-N50(KP)CX and MSO-N65(KP)CX.

## 1.8.8 Pneumatic Time Delay Modules

Table 1.8.8

 <p><b>UN-TR4AN</b></p>	Contactor/Relay	On delay
	S-N10(CX)	<b>UN-TR4AN(CX)</b>
	S-N11(CX)	
	S-N12(CX)	
	S-N18(CX)	
	SR-N4(CX)	
	SD-N11(CX)	
	SD-N12(CX)	
	SRD-N4(CX)	

For detail see item 4.6.

Note : UN-AX11(CX) (Table 1.8.3) can not be combined to a Contactor / Relay together with UN-TR4AN (CX).

## 1.8.9 DC Interface Modules

Table 1.8.9

<p>Direct mounting to contactor</p>  <p><b>UN-SY21</b></p>	Contactor/Relay	Solid state	Relay

## 2. MOTOR PROTECTION RELAYS

### 2.1 Thermal Overload Relays

**TH-N Series Thermal Overload Relays Will Make a Convenience and Safer Systems.**

TH-N12

TH-N20

TH-N12CX

#### A Selection of Relays for Optimum Motor Protection Characteristics

The thermal relay line-up includes two-element units as well as the phase failure protection type models (three-element relays), all with the same external dimensions.

This array of protection characteristics allows you to choose the units best suited to your motor protection needs.

#### Maintenance and Inspection Are Easy

An operation indicator makes maintenance and inspection easy. Checks can be performed using manual operations.

#### 1NO + 1NC Contacts

#### • Display and External Trip Mechanism

#### Rated Current Can Be Set Easily

The value of the rated current is displayed on a dial. Simply adjust the dial to the full-load current of the motor and motor protection is assured.

#### Finger Protectors

Models with finger protectors that conform to DIN VDE 0106 Part 100 (TH-N□CX) are also available.

#### Various Accessories

- Independent mount adaptor for TH-N12(CX). : UN-HZ12(CX)
- Reset release : UN-RR□□□
- Trip indicating LED : UN-TL□□

#### Trip-Free Reset Bar

Choose between automatic and manual reset. Also features tripfree reset bar mechanism.

#### • Switching Between Automatic and Manual Reset

## 2.2 Electronic Motor Protection Relays

Series ET-N

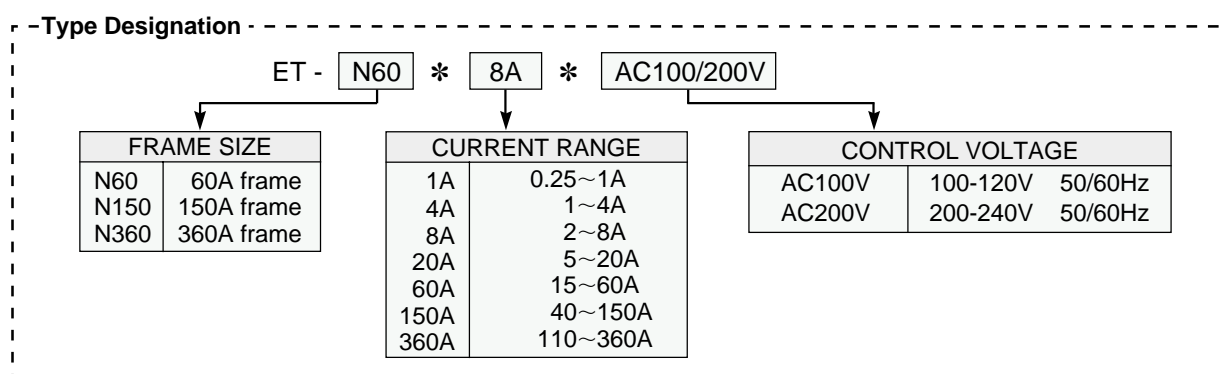

ET-N60 60A

The MITSUBISHI series ET-N relay is an excellent relay that can protect motors electrically. Those series ET-N relays have the following excellent features.

### ■ Features

- Selectable Protection Mode
  - Overload (including locked rotor condition)
  - Phase failure (including current unbalance)
  - Incorrect phase sequence
- Excellent Wide Current Range
- Easy Wiring
- Easy Setting and Maintainance
- Selectable Tripping Time at 600% of setting.
  - Standard trip (7s.)
  - Quick trip (3s.)
  - Fast trip (5s.)
  - Medium trip (15s.)
  - Slow trip (30s.)
- Withstands High Overcurrent
- Fine Indication of Trip Mode
- Conformity to International Standards
- Can be mounted on 35mm rail (ET-N60)

### ■ Specifications

#### • Ratings and characteristics

Note: ET-N relay cannot be used on DC circuit

## • Characteristic Curves

## • Selection of Protection Mode & Tripping Time

Table 2.2.2

The selector switch is set at position “7” (overload and phase failure protection mode; standard trip type) when shipping.

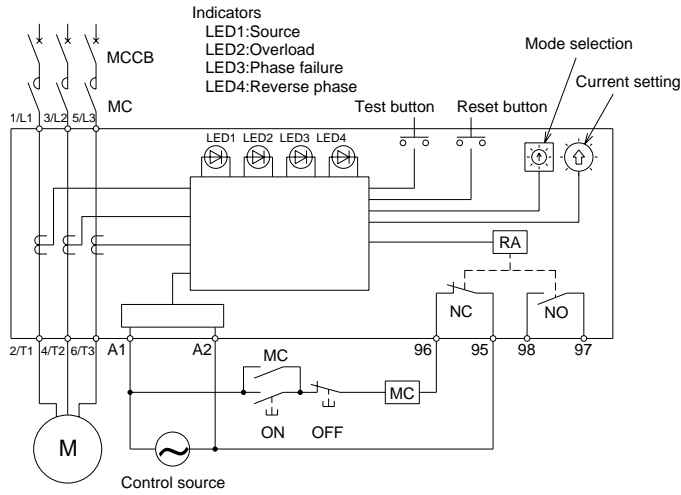

So please reset the position of the changeover switch according to Table 2.2.2 before installation.

Protection mode	Overload tripping time at 600% of setting(s)	Symbol on changeover switch
Overload, phase failure and reversal phase [3E]	3	0
	5	1
	7	2
	15	3
	30	4
Overload and phase failure [2E]	3	5
	5	6
	7	7
	15	8
Overload only [1E]	30	9
	3	A
	5	B
	7	C
	15	D
	30	E

## • Application to High Voltage or Big Motor Circuit

The high voltage current transformer (secondary current: smaller than 5A: capacity: more than 5VA) should be connected to ET-N60\*8A in the star connection, when the load is high voltage or big AC motor.

## ■ Wiring Precautions

- The control source should be wired in the same phases as the contactor control source.
- When the load is a single phase motor, use 1/ L1-2/T1 and 5/L3-6/T3 phases.  
And re-set the position of changeover switch to "A" to "E".

- If capacitors are used to correct the power factor, connect the capacitor in the power source side of the ET-N relay.

## ■ Outline Dimensions

**ET-N60(1-60A) (Mass: 0.3kg)**

**ET-N150 (Mass: 1.6kg)**

**ET-N360 (Mass: 2.5kg)**

# 3. DEFINITE PURPOSE CONTACTORS & STARTERS

## 3.1 DC Contactors

Series DU

DU-A60

DU-K180

The MITSUBISHI series DU contactors are designed for DC circuits, that is the variable-speed drive-control circuits (SCR switching circuit) and DC motor control circuits.

### Features

- Compact design
- High break capacity
- CSA certified models are also available on AC operated type, add suffix "UR" immediately after the Frame size.
- Double break contacts
- UL recognized component (If  marking is required add suffix "UR" immediately after the Frame size).
- Long Life

### Specifications

- Number of main contacts type DU : 2NO1NC, type DUD : 2NO  
Number of auxiliary contacts type DU & DUD : 2NO2NC

### • Ratings

Table 3.1.1

Frame size				A30	A60	A120	K180	K260

Notes: 1. Mechanical life of the latched type is 0.25 million operations.  
 2. Mechanical life of vacuum tube is 1 million.  
 3. When the load is three phase capacitors, electrical life is 0.1 million operations.  
 4. Electrical life of the latched type is 0.25 million operations.

## ● Coil Designation

Table 3.2.3

Coil designation	Rated voltage
AC100V	100~127V 50/60Hz
AC200V	200~240V 50/60Hz
AC300V	260~350V 50/60Hz
AC400V	380~440V 50/60Hz
AC500V	460~550V 50/60Hz
DC100V	100-110 VDC
DC200V	200-220 VDC

Note: When ordering the latched type contactor, specify the coil designation of the closing coil and the tripping coil.  
 Place "MC" before the closing coil designation and place "MT" before the tripping coil designation.

## ■ Spare Parts & Accessories

Table 3.2.4

Contactor Catalog Number	Coil Part Number <sup>1</sup>	Main Contact Part Number	Auxiliary Contacts Number		Vaccum Tube Gauge Part Number
			Replacement(1NO 1NC)	Add-on(2NO 2NC)

SH-V600	SH-V600COIL AC ..... V	SH-V600TUBES <sup>2</sup>		UA-AXVV4	SH-V600 GAUGE

Notes: 1. See Table 3.3.3 for Coil Designation.  
 2. Set of three vacuum bottles supplied.  
 3. Consists of two UA-AXVV1 contact blocks on the mounting plate. Mounts on left side of contactor.

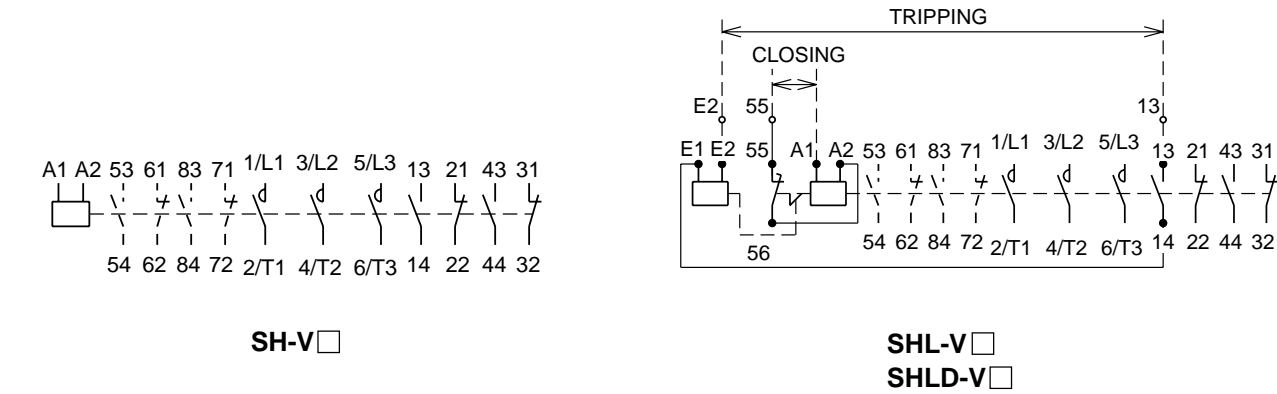

## ● Surge absorber

As the vacuum tubes of SH-V use a special contact material, the surge voltage by current chopping is very small. Surge absorbers are required only for motors smaller than 5.5kW.

Table 3.2.5

Applicable voltage	Ordering designation
up to 440VAC	<b>UA-SU4</b>
up to 550VAC	<b>UA-SU5</b>
up to 660VAC	<b>UA-SU6</b>
up to 1,000VAC	<b>UA-SU10</b>
up to 1,500VAC	<b>UA-SU15</b>

# Outline Dimensions

## 3.3 Compact 3-Pole Contactors

The MITSUBISHI series S-N $\square$ 8 compact 3-pole contactors are designed for limited panel space applications such as machine control panels.

S-N48

### Features

- Compact design—Very limited required mounting space.
- Front clip-on type auxiliary contact block can be added.
- Coil surge absorbers are available. • Can be mounted on 35mm rail.

## 3.4 NC Main Contact Contactors

B-N20

B-A65

The MITSUBISHI series B-N/A contactors are specially designed for the dynamic braking circuit of motors, switching motor-starting resistors and switching of emergency lighting.

### Features

- 2 or 3 NC main contacts.
- Suitable for a variety of loads.
- Compact design
- Both AC operated models & DC operated models

#### Type Designation

### Specifications

- Number of main contacts: Special arrangement 3 NC can be supplied only with type B-N20/A65. aux. contacts: 2NO fixed.

## 3.5 Heavy-Duty Clapper-Type Contactors

Series CD

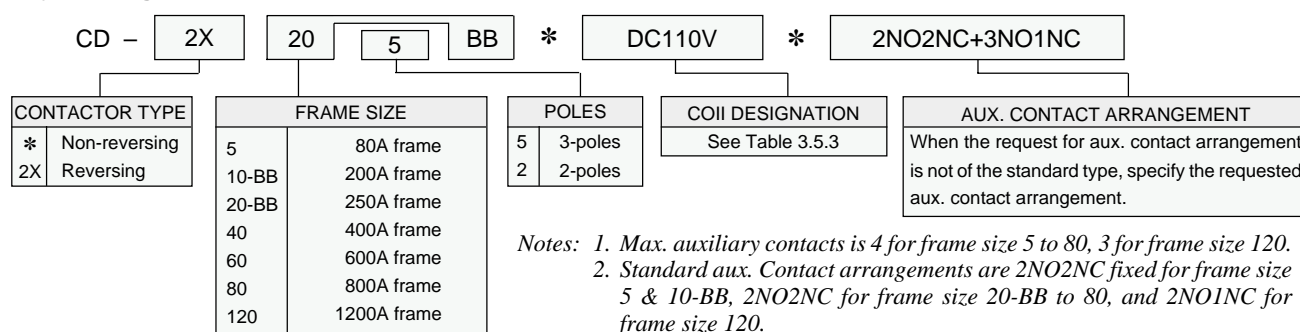

CD-205BB

The MITSUBISHI series CD, heavy-duty clapper-type contactors are specially designed for the crane control or for the rolling mill control, where checking and maintenance are very important.

### ■ Features

- Long life under high switching-frequency operation
- Stable operation and high reliability
- Easy checking, maintenance and replacement
- Versatile construction of aux. Contacts
- Standardised mounting hole dimensions

### Type Designation

3.6 Delay Open Type Magnetic Starters & Contactors

Series S/MSO-N□DL

MSO-N□DL

The MITSUBISHI series MSO-N□DL starters and S-N□DL contactors are specially designed to prevent instantaneous “drop-out” when connected to motors, resulting from momentary voltage drop or power interruption caused by lightening or similar.  
A capacitor connected in parallel with the operating coil of the contactor discharges so that the starter or contactor will remain closed for 1 to 4 seconds.

Type Designation

Diagrams Circuit

Typical Wiring Diagram

Note: R/1-R/1 & S/3-S/3 (---) wiring is omitted if the control circuit voltage is 100VAC or the main circuit voltage differs from the control circuit voltage.

## ● Caution

1. When the circuit breaker (NF) is made (ON) and disconnected (OFF) repeatedly within a short time interval [eg: when the instantaneous power failure occurs within a short time interval], electrical parts might be damaged or specified holding time might not be assured.  
Causes; 1) Overload occurs by frequent inrush current to RF and R1.  
2) Enough electricity is not charged into the capacitor (C).
2. Even after the power is turned off (after the NF is disconnected), current might remain in the capacitor (C). So please take care to avoid the electrical shock, when you check or repair the system.

## 3.7 DC Interface Contactors

Series **SD-M**

The MITSUBISHI series SD-M contactors are specially designed to be directly driven by the transistor output (DC24V) of a programmable sequence controller, etc.

### ■ Features

- Low coil power consumption: By combining an electromagnet with permanent magnet, coil operating current is reduced to DC24V 60mA (1.5W) for SD-M11, M12 and 75mA (1.8W) for SD-M19.
- Compact construction: Width 45mm, Height 48mm, Depth 61mm in Type SD-M11
- Can be mounted on 35mm rail
- Operating indicator (LED)
- Coil surge absorber
- Bifurcated auxiliary moving contacts having high contact reliability
- Safty clear terminal cover
- Easy wiring: All terminals are in the same plane
- Integrated reversing contactor with mechanical and electrical interlock

## 3.8 DC Interface Modules

S-N21CX+UN-SY21CX

The MITSUBISHI type UN-SY interface module is an optional unit for S-N series contactors or SR-N series relays, controlled by the transistor output of a programmable controller.

### ■ Features

- Easy mounting on the Type S-N10 to S-N65 contactors and SR-N series relays.
- Separate mounting type for the Type S-N80 to S-N400 contactors.
- Relay or solid state output versions are available.

#### Type Designation

Note: Suffix "CX" is available only for UN-SY21 or SY22.

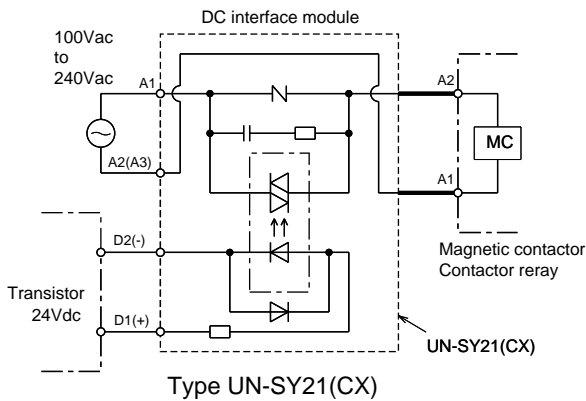

### ■ Specifications

Table 3.8.1

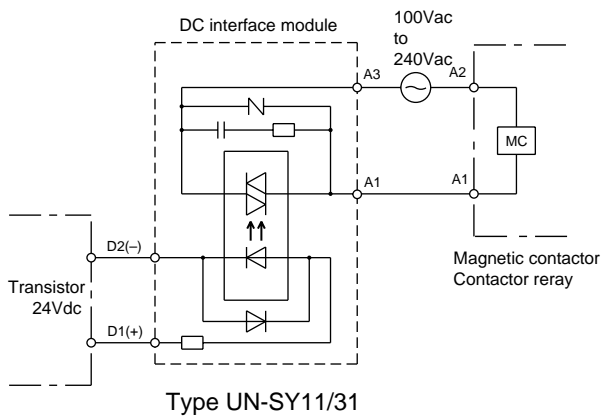

Type		UN-SY21(CX)	UN-SY31	UN-SY11	UN-SY22(CX)	UN-SY32	UN-SY12
Output		Solid state relay			Relay		
Applicable Type of contactor or relay	Direct mounting to contactor or relay	S-N10 to N35 S-N18, N28, N38, N48	S-N50, N65	—	S-N10 to N35 S-N18, N28, N38, N48	S-N50, N65	—
	Separate mounting	—	—	S-N80 to N400	—	—	S-N80 to N400
Input	Rated control voltage	24Vdc			24Vdc		
	Permissible voltage tolerance	80% to 110% of rated control voltage					
	Min. working voltage	18Vdc			18Vdc		
	Max. breaking voltage	4Vdc			1Vdc		
	Power consumption	0.4W			0.24W		
Output	Rated voltage	100Vac to 240Vac 50/60Hz					
	Rated operating current	0.5A (category AC11)					
	Responce time	11ms or less			10ms or less		
	OFF-state leakage current	3mA/240Vac			—		
	Mechanical life	—			5 million operations		
	Electrical life	—			1 million operations		
Ambient temperature		−10 to 55°C					

## ■ Connection

### (1) Solid State Output

### (2) Relay Output

## ■ Mounting

- Direct mounting — Type S-N10 to S-N65 and SR-N4  
Remove the coil terminal screw from the contactor or relay, then slide the tab on the interface module to the groove on the contactor or relay. Fasten the connecting conductor with the coil terminal screw.
- Separate mounting — Type S-N80 to S-N400  
Mount the interface module (UN-SY11/12) with screw on a panel as follows.

## ■ Outline Dimensions

Type Number	UN-SY21/22(CX)	UN-SY-31/32	UN-SY11/12

	Mtg. hole layout for separate mounting		

## 4. RELAYS

Series SR-N

### 4.1 Contactor Relays

SR-N4

The MITSUBISHI series SR-N contactor relays are specially designed for use in low voltage control circuit applications. Series SR-N have many superior features.

#### Features

- High reliability: By adopting bifurcated moving contacts and by improving the shape of the contacts, contact performance has been made more reliable than ever.
- Long life
- Can be mounted on 35mm rail
- Dust-proof construction
- Easily visible coil ratings
- Easy wiring (self-rising terminal screws)
- Various accessories common with the series S-N contactors (Head-and side clip-on type additional aux. contact blocks, surge absorbers, safety covers)
- Finger protected types are available (DIN 57106/VDE 0106 Part 100)

#### Type Designation

##### Standard types

Notes: 1. For latched type relays, JH and LC types cannot be available.

2. When ordering the latched type relays, please specify the closing coil and tripping coil voltage.

ex: SRL-N4 \*MC-AC200V \*MT-AC100V \*4A  
closing coil tripping coil

3. Only suffix "CX" is admitted to make any combination with other tabulated suffixes.

Note: Mark \* indicates a blank space.

## 4.1.1 Specifications

### Rating and characteristics

SRD-N4(CX)	110	138	0.62
SRL-N4(CX) SRLD-N4(CX)	134	—	0.45

Note: Front clip-on and side clip-on contact block should not be mounted both.

## 4.2 Voltage Detection Relays

SRE-AA

The MITSUBISHI series SRE relays are specially designed for voltage sensing. The type SRE-A is specially designed for the detection of undervoltage or overvoltage conditions. The type SRE-K is particularly useful for the switching of automatic transfer panels. The type SRE-K can detect undervoltage by simply connecting to the power-source terminals.

### Features

- High sensibility
- High reliability
- Easy wiring
- High surge tolerance
- Wide detective voltage range

#### Type Designation

## Specifications

### Selection table

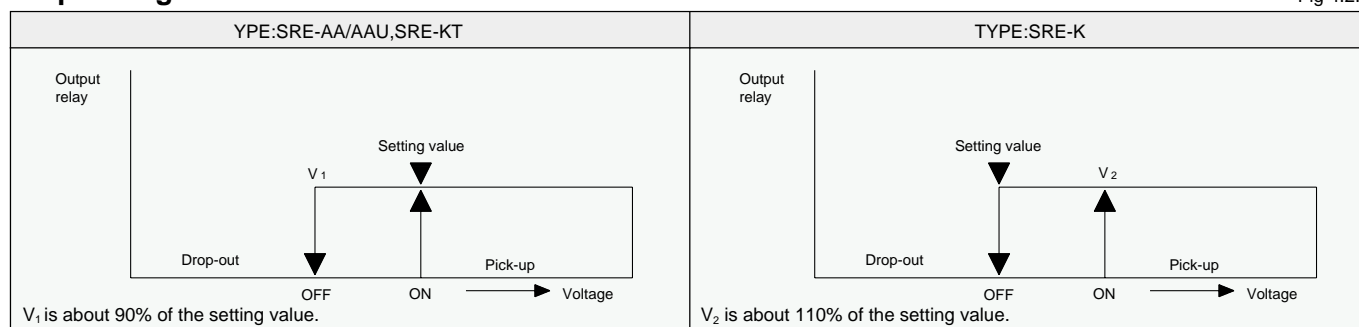

Table 4.2.1

Type	Detectable voltage range	Permissible input voltage (continuous)	Input impedance	Operation voltage

## 4.3 Re-Starting Relay

UA-DL2 with PF-08RM

The MITSUBISHI series UA-DL re-starting relays are specially designed for automatic re-starting. When the power recovers from an instantaneous power failure or voltage drop the UA-DL re-starts the stopped equipment or machines.

### Features

- Easy installation and easy wiring
- Compact design
- Versatility of the control voltage (100VAC & 200VAC)
- Indicator lamp is provided.
- Selectable permissible max. power failure time (1sec. & 2sec.).

### Type Designation

UA-DL2 \* AC100/200V

SOCKETS type: PF-08RM/08TM

See page 66

CONTROL VOLTAGE	
Ordering designation	Rated control voltage (50/60Hz)
AC100/200V	100-110/200-220VAC
AC100V	100-110/110-120VAC
AC200V	200-220/220-240VAC

Notes: 1. DC control voltage type is not available.  
2. Mark \* indicates a blank space.

## Specifications

### • Ratings & characteristics

Table 4.3.1

## 4.4 Solid State Time Delay Relays

Series **SRS-H**

SRS-HNPS

The MITSUBISHI series SRS-H solid state time delay relays are specially designed for high accuracy and easy mounting.

### ■ Features

- High accuracy
- Compact design
- High reliability
- Easy mounting (for direct panel mounting or mounting on 35mm rail)
- With finger protection (terminal cover) model is available
- 1 delayed & 1 instantaneous changeover contact for ON-delay relay.

#### Type Designation

### ■ Specifications

#### • Time delay selection

## 4.5 Pneumatic Time Delay Relays

Series SRT-N

The MITSUBISHI series SRT pneumatic time delay relays are designed for general purpose time delaying, such as star-delta starters and transfer panels.

### Features

- Easy delaying time adjustment
- High contact reliability: By using bifurcated moving contacts, contact performance has been made more reliable than ever.
- Finger protected types are available
- Manual testing
- 2 delayed contacts (1NO1NC) & 4 instantaneous contacts (2NO2NC)
- Can be mounted on 35mm rail

### SRT-NN

#### Type Designation

Note: Mark \* indicates a blank space.

## 6. SOLID STATE CONTACTORS

Series **US-K**

### 6.1 Features

#### Ideal for heavy duty applications

The contactor contains no moving parts, so its reliability and long life are assured even in high cycling applications.

#### Silent operation

Since the contactor has no moving part, noise is eliminated.

#### Completely insulated power circuit

The power circuit elements are electrically insulated from the heatsink. No insulation of the heatsink is required.

#### Easy connection

Up-front wiring.

#### Built-in surge absorber

Surge absorbers are built-in for protection of the power circuit elements from line surges.

#### Indicator lamp shows operating condition

Front-mounted for clear indication of operational state.

#### Compact size

The contactor consists of a small size body and heatsink.

## 6.2 Product Scope.
